## Product Description

### New Aqualyx Weight Loss Slimming Dissolve Fat Dissolving Injections Aqualyx

#### Matters needing attention in rehabilitation and nursing:

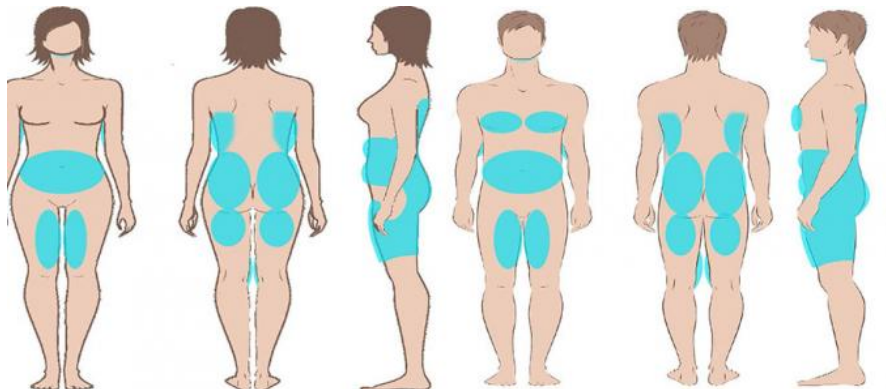

1. Ice compress is required after treatment.
2. Local disinfection should be done before and after treatment.
3. No local water washing within 24 hours after treatment, no hot water scalding and vigorous exercise within 48 hours.
4. No coffee or tea within 48 hours after treatment. Drink plenty of water.
5. Before treatment, make sure there is no rupture, infection or redness in the treatment area.
6. 24 hours after the injection of the fat-dissolving needle, the whole face should not be stained with water or contaminated, do not use cosmetics, and do not exercise vigorously.
7. Topical drugs and other irritants shall not be daub on the injection site and surrounding areas 72 hours after the injection.
8. Do not drink alcohol or eat stimulating food, pepper or seafood within one week after the injection; Try to pay attention to the normal diet, do not overeat, do not eat fatty polysaccharides food, strengthen exercise to enhance physical fitness.
9. It is very important to manage and maintain the lipid after injection. It is necessary to apply hot compress and massage the injection site to help dissolve and metabolize subcutaneous fat. Choose to hit dissolve fat needle, insist to hit at least 2-3 times, do not feel the first time did not have the effect to think of doubt or even give up.

#### Taboo Group:

Patients with diabetes should avoid using Aqualyx, as the potential complications of diabetes can be complicated by treatment;  
 Patients with autoimmune diseases such as scleroderma should avoid treatment;  
 Patients with severe liver disease should not be treated with Aqualyx because of excess fat which has the process of accumulation and may lead to liver disease;  
 Ingredients of Aqualyx should be avoided in patients with a history of allergic reactions;  
 The coverage of acute or chronic skin diseases in the affected area or infected skin in the treatment area is not suitable for treatment;  
 Renal disease in severe patients is not suitable for treatment.

#### Safety tips:

Precautions after treatment: do not take antibiotics, aspirin, alcohol, seafood spicy (within 30 days), hot apply the injection site with a hot towel on the second day after the injection, adhere to the hot apply, can accelerate the effect and loose swelling, do not touch the wound water on the injection day.
