

Wrinkles Removal Injectable dermal fillers Plla Poly-L-Lactic Acid For Face Body

Our Product Introduction

Basic Information

- Place of Origin: Italy
- Brand Name: dermal fillers
- Model Number: 5ml/vial
- Minimum Order Quantity: 1 box
- Packaging Details: box
- Delivery Time: 4-7work days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union
- Supply Ability: 1456+box+week

Product Specification

- Product Name: Dermal Fillers Plla Poly-L-Lactic Acid
- Ingredient: Chemical, Poly-L-Lactic Acid/Plla
- Apply For: Injectable Dermal Fillers
- Color: White Color
- Material: Poly-L-Lactic Acid
- Area: Facial Wrinkles And Folds
- Keywords: Anti-Aging Plastic Facial Surgery Dermal Fillers
- Trademark: Dermal Fillers

Product Description

Wrinkles Removal Injectable dermal fillersss Plla Poly-L-Lactic Acid For Face Body

What Is dermal fillersss

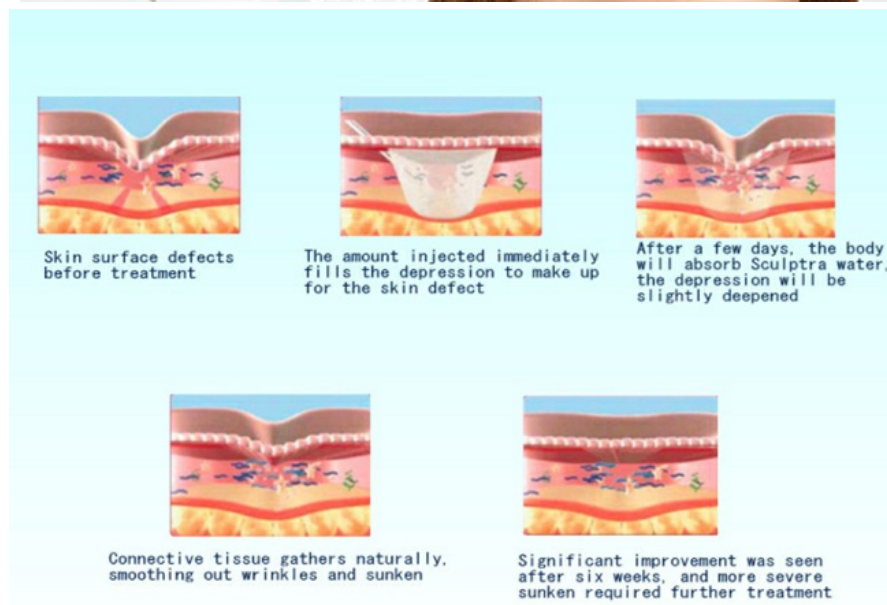

dermal fillersss® is made from a biocompatible substance known as poly-L-lactic acid, a synthetic version of the substance naturally produced by the body during exercise. Because dermal fillersss® is not derived from human or animal products, no skin test is required.

dermal fillersss is a new injectable used to fight wrinkles and sagging skin by stimulating the skin's collagen production to help restore the cheeky plumpness of healthy skin. It is an alternative anti-aging treatment to injectable dermal fillers, skin creams, fat injections and implants. Collagen is an important structural protein found in connective tissue. Its function is to keep the skin firm, youthful and smooth.

Facial fat loss (lipoatrophy), is an age-related condition that can result in prominent facial folds, sunken eyes, and hollow cheeks. dermal fillersss® Aesthetic targets these areas to correct shallow to deep facial wrinkles and folds. The treatment is suited to nasolabial folds (smile lines) between the nose and mouth, the lines framing the mouth (marionette lines), and wrinkles in the chin.

What is the usual treatment protocol for dermal fillersss?

On average, a minimum of three treatment sessions are needed over a period of several months. The number of injection sessions and the length of time between sessions vary from person to person. Older patients, thinner patients, and patients who exercise extensively may require more product or more treatment sessions.

Massage step

Within 5 days after use, patients are advised to massage the treated area by themselves 5 times a day for 5 minutes each time, from bottom to top

1. Slide around your eyes to your temples

2. Place your thumb against your temple and press gently outward from the center to your temples

3. The depression under the bone is massaged repeatedly

4. The hands slide on each side of the cheekbone in a curved shape

5. Clench the fist from bottom to top massage to stretch to raise

6. Gently press your thumb under the ear, hook your hands and pull up from under the ear
