Product Description

Aqualyx fat dissolving injections kabelline injectable lipolysis ppcs solution loss weight 8ml x 10 bottle AQUALYX

Aqualyx can be effective at removing small pockets of stubborn fat. It is not an alternative for liposuction for large areas of fat removal and is not a substitute for a healthy lifestyle. The results will last if a stable weight is maintained. One thing to consider, if you have very lax skin, is that removing fat may leave you with excess skin which may require skin tightening afterwards. Some practitioners may combine Aqualyx with skin tightening treatments such as HIFU or radiofrequency.
