effect	filler wrinkles remove
usage	beauty clinic
size	150mg/5ml x 2 vials
type	dermal fillerss plla lactic acid
usage	facial wrinkles filler buttock enhance
feature	wrinkles remover

Advantages

Injectable poly-L-lactic acid (PLLA) is a synthetic, biodegradable polymer device approved in the United States for use in immunocompetent patients as a single regimen of up to four treatment sessions for correction of shallow to deep nasolabial fold contour deficiencies and other facial wrinkles.

dermal fillerss plla lactic acid

dermal fillerss Aesthetic is an injectable implant containing microparticles of poly-L-lactic acid (PLLA), carboxymethylcellulose (USP), non-pyrogenic mannitol (USP) and sterile water for injection (USP). dermal fillerssAesthetic is available in 367.5 mg dose vials and is to be reconstituted prior to use by the addition of 5 mL of Sterile Water for Injection, USP (SWFI) to form a sterile nonpyrogenic suspension.

Used For?

The areas commonly treated with dermal fillerss include: the temples, the mid cheek region and the lower face for hollowing, depressions, fine lines and jowling. dermal fillerss can be evenly distributed in all of these areas or focused injections can be performed in specific target regions
