type	3ml x 10 bottle
usage	filler injection
effects	anti wrinkles
effects1	anti aging
use for	wrinkles remove
use ares	facial wrinkles remove
moq	1 box

what is filorga

NCTF (Filorga) 135HA is made with hyaluronic acid, which helps to add some volume beneath the skin, smoothing out fine lines and a rough texture. Mainly, the hyaluronic acid in NCTF (Filorga) 135HA helps to hydrate the skin, giving it a youthful glow, as well as encouraging the production of collagen and elastin and improving skin structure. However, unlike other similar injectables, NCTF (Filorga) 135HA contains fifty-three extra ingredients to nourish your patient's aging and photodamaged skin. This includes fourteen vitamins, including A, B, C and E, which stimulate vital cell functions, as well as four minerals to prevent and correct skin deficiencies. NCTF (Filorga) 135HA also contains twenty-four amino acids to encourage the growth of collagen and elastin, six coenzymes to catalyse bio-chemical reactions in the skin tissue, five nucleic acid bases to activate cellular communication, and two anti-oxidants to capture free radicals and prevent skin damage. The unique combination of ingredients in NCTF (Filorga) 135HA helps to give your patient's skin the nutrients it needs to repair and protect itself. The Laboratories NCTF were founded by a French doctor of aesthetic medicine. Some years later, he created the unique, injectable solutions 135 & 135 HA, developed to correct* the signs of skin ageing.

How to use

Only licensed, properly trained medical practitioners should perform treatments with Filorga 135. The treatment should be performed with an injector gun, or with the needles provided in the package. This cosmetic filler may be injected into a variety of problem areas via the superficial dermis or the dermal-epidermal connective tissues. It is suitable for use in the abdomen and limbs, as well as the facial area, neck, and décolletage. Please inform the patient that it will take a minimum of 5 treatment sessions, spaced over the course of 3 months, for them to see significant improvement.

how long lasting

Mesotherapy is series of micro-fine injections into the superficial skin layers to place nutrients right where they are needed to nourish and rejuvenate the skin. For best results a course of 3 treatments is advised every two weeks with maintenance treatments 1-2 times a year.

Effects

Mesotherapy is series of micro-fine injections into the superficial skin layers to place nutrients right where they are needed to nourish and rejuvenate the skin. For best results a course of 3 treatments is advised every two weeks with maintenance treatments 1-2 times a year.
