Profhilo A Anti Wrinkle Hyaluronic Acid Dermal Filler 2 Ml X 1 Syringe / Box

Our Product Introduction

Basic Information

- Place of Origin: Korea/China
- Brand Name: profhilo
- Model Number: profhilo-A
- Minimum Order Quantity: 1 box
- Price: USD175-200 / box
- Packaging Details: box
- Delivery Time: 3-6 days
- Payment Terms: TT/Western Unio/ LC /WesternUnion/ Paypal/credit card
- Supply Ability: 10000000 boxs /day

Product Specification

- Product Name: Hyaluronic Acid Dermal Filler Profhilo Injection
- Size: 2ml X 1 Syring /box
- Use: Injection Filler Profhilo
- Type: Profhilo Filler Wrinkles R
- Use For: Beauty Aesthetics Clinic
- Deliver: By UPS/FedEX/DHL/EMS/TNT
- Feature: Improves Skin Tone, Texture, Hydration And Overall Radiance
- Effect: Increase Firmness And Elasticity And Promote Healthier And Softer-looking Skin
- Highlight: **profhilo A Hyaluronic Acid Dermal Filler**, **profhilo A anti wrinkle hyaluronic acid**, **Profhilo A anti wrinkle hyaluronic acid 2 ml x 1 syringe / box**

feature	Smooths crow's feet Smooths skin around the mouth
Intended for	Antiaging Effect, Collagen Stimulation, Strong and Lasting Hydration
type	profhilo 2ml injection
treatment	Initial Cycle: 2 Treatments, 1 month apart; - Repeat Cycle: Every 6 months
size	2ml / box

profhilo

The first of its kind, Profhilo is a revolutionary 'beneath the skin' hyaluronic acid moisturising treatment, made with the patented NAHYCO technology. This results in a unique hyaluronic acid injectable gel, which has a prolonged stimulating activity on the dermal cells. When injected into skin, Profhilo stimulates the skin cell receptors to counteract skin laxity and improve and restore firmness of the skin.One of the highest concentrations of hyaluronic acid on the market, Profhilo not only boosts and hydrates the skin, but also remodels ageing and sagging tissue. The most common areas of treatment include the face and neck and can also be used for the décolletage, hands, arms, knees and abdomen area where it would effectively treat skin laxity. The treatment is suitable for men and women as well as offering skin benefits for patients of all ages.

Befenits

Treatment with Profhilo improves skin tone, texture, hydration and overall radiance. It can help to increase firmness and elasticity and promote healthier and softer-looking skin. Profhilo is most commonly used for facial areas, but can also be used to rejuvenating the neck, decollete, arms, knees and hands.Profhilo is injected just below the skin's surface over 2 sessions 4 weeks apart. After injection it disperses quickly beneath the skin to improve hydration, without any need for massage or risk of leaving lumps or nodules. Profhilo is absorbed within a 2cm radius of its injection site, so to treat the face only 10 injection points are needed in total.
A single course of Profhilo involves 2 injectable treatments 4 weeks apart, after which you can expect to see an intense hydration. It makes the skin glow, fine lines can disappear and you'll notice smoother, tighter skin. Courses of two treatments can be repeated every six months as needed to maintain the results.

Intended

HA is hydrophilic, meaning it draws and holds water from your body, so Profhilo acts as a hydrator rather than a filler. This makes it fantastic for those with tired, dull-looking skin, transforming it into firm and luminous skin. This effect takes place within 3-5 days of treatment.
Over the next few weeks collagen and elastin production is stimulated, producing a secondary effect of skin tightening. This is useful because levels of collagen, elastin and Hyaluronic Acid in the skin rapidly drop from the age of 30, resulting in signs of ageing such as fine lines, wrinkles and lacklustre skin. Profhilo acts to reverse some of these changes. The maximum effect of Profhilo is usually seen 2 months after the second treatment.

To maximise the diffusion in the malar and sub-malar areas:

- The BAP were specifically chosen in anatomically respective areas
- The dilution phenomenon of the product itself
- 5 injections per side
- Reduced (slow injection)
- Lower possibility of bruising or hematoma
- Reduced number of treatment sessions
- Greater patient compliance
