Single Use Micro Cannula Needle For Dermal Filler ISO 13485

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Blunt Micro Cannula
- Certification: CE
- Model Number: 18g-30g
- Minimum Order Quantity: 30pcs
- Price: 0.8usd/pcs
- Packaging Details: bag
- Delivery Time: 4-7work days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union,
- Supply Ability: 13333box per week

Product Specification

- Product Name: Micro Cannula
- Material: Stainless Steel Blade
- Function: Micro Cannula For Dermal Filler Injection
- Application: Medical Disposable Blunt Tip Needle
- Usage: Single-use
- Package: 1pc/Pack,50pcs/box
- Type: Medical Disposable Blunt Tip Needle Micro Cannula
- Keyword: Blunt Tip Needle Micro Cannula
- Highlight: **Single use Micro Cannula Needle**, **microcannula for dermal filler ISO 13485**, **Single use microcannula for dermal filler**

Product Description

Medical Disposable Blunt Tip Needle Micro Cannula For Dermal Filler Injection

Micro cannula blunt tip needle for beauty injection

Specifications:
1)Superior quality and complies with international cosmetology and medical requirements.
2) Needle made of medical grade stainless steel.
3) sterile package
4) Disposable, for single use only.
5)Different size available,special design is available

What's The Procedure?

At the source of the filler injection using Microcannula, your Doctor creates a minute entry point in your skin using a precise, sharp needle. This is a vital step since the Microcannula has a blunt tip and is incapable of penetrating the skin by itself. The insertion location is minimal and does not cause substantial pain or bleeding.
Then the Doctor skillfully inserts the Microcannula into the small opening and glides it under your skin to reach the sections of filler injection. The Microcannula then slides within the spaces connecting the tissue. It can be moved under the skin without any injuries to tissue. Patients typically do not feel much pain, if any, as the Doctor guides it under their skin.
