usage	facial injection
feature	Prevents the onset of ageing and the formation of pigmentation
Intended for	various skin care treatment especially for damaged and sensitized skin caused by Laser treatment or repetitive treatment.
type	2.2ml injection
treatment	Reduces inflammation and swelling
size	2.2ml x 5 bottles / box

What is D+cell?

D+CELL is a professional derma care product with PDRN® as its main active ingredient, as well as being rich in free hyaluronic acid. PDRN is the acronym for Poly Deoxy Ribo Nucleotide, which is a substance extracted from the sperm of salmon. Sometimes it is called Salmon DNA by the lay public. D+Cell with its high-quality stamp applicator is designed to treat dull skin and wrinkles, as well as for intense hydration and skin replenishment. This treatment will improve the overall skin quality over time, plus enhance and prolong the effects of aesthetic treatments in the doctor's office.D+cell is a regeneration treatment that is HSA approved. Impressively, its effectiveness and safety were verified through various independent clinical studies.

Benefits

D+cell is an active serum that is sterilised by double cold filtration to preserve the effectiveness and the integrity of its active ingredients. It does not contain any preservatives; one vial of serum is for a SINGLE treatment. Please do not keep any leftover serums.

How to Use D+cell?

Cleanse and preferably exfoliate the skin, pat dry. Open the vial of serum and apply half the vial of serum over the face, do not massage. Use the stamp applicator and press onto the skin surface in a light stamping action, covering the whole face. Starting from the top of the forehead, stamp the applicator from right to left, stamping each spot 3 times. Apply the 2nd half of the serum and repeat the process. This treatment can be done on the neck, although you may need another vial of D+cell.

Effects

Useful in skin revitalisation through the compatibility of PDRN to human skin
Reduces sensitivity and strengthens skin barriers
Stimulates the fibroblasts to produce new collagen actively.
Improves microcirculation and boosts radiance.
Helps to heal acne scars
Prevents the onset of ageing and the formation of pigmentation.
Lasting results as it penetrates deeper than topical skincare.
Easy to perform this treatment at home
