

1500IU Hyaluronic Acid Injection Filler Hyaluronidase Inj 4*3*8cm

Our Product Introduction

for more products please visit us on hadermal-filler.com

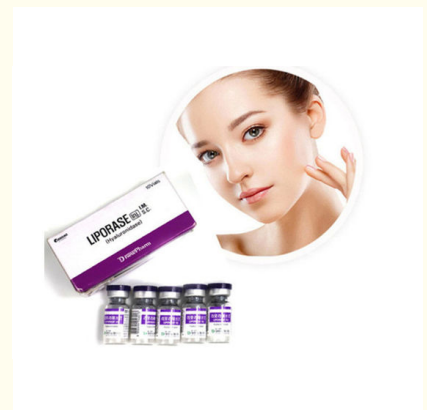

Basic Information

- Place of Origin: korea
- Brand Name: Liporase Hyaluronidase
- Certification: ce
- Model Number: Liporase Hyaluronidase
- Minimum Order Quantity: 1box
- Price: 50usd
- Packaging Details: box
- Delivery Time: 4-7work days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union
- Supply Ability: 12222box per week

Product Specification

- Product Name: Liporase Hyaluronidase
- Apply For: Remove The Body Remaining Hayluronic Acid
- Material: Liporase Hyaluronidase
- Package: 10 PCS/Box
- Specification: 1500iu
- Color: White Color Powder
- Keywords: Hyaluronic Acid Filler Injection Remover Liporase
- Function: Hyaluronic Acid Filler Injection Remover Liporase
- Highlight: 1500IU Hyaluronic Acid Injection Filler, 1500IU hyaluronidase inj 4*3*8cm, hyaluronidase inj 4*3*8cm 1500IU

Product Description

Liporase Hyaluronidase For Hyaluronic Acid Filler Injection Remover Liporase

Product Application

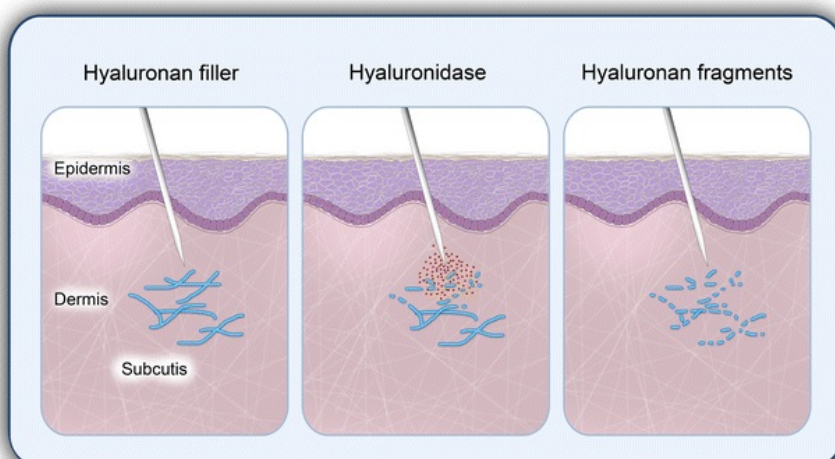

Hyaluronic acid lyase, also known as hyaluronidase or "Hyaluronidase for Injection", is a kind of enzyme that can hydrolyze hyaluronic acid. Hyaluronic acid lyase is a natural enzyme, which has hydrolysis effect on hyaluronic acid. It eliminates the injections of inappropriate parts and eliminates the excessive injection of hyaluronic acid, resulting in the elimination rate of 90%. It is mainly used to repair the failure of hyaluronic acid shaping. Hyaluronic acid lytic enzyme is a substance that dissolves hyaluronic acid. After hyaluronic acid injection, it doesn't feel very good after cosmetology. It can be dissolved in hyaluronic acid within 48 hours, and then it can be filled with hyaluronic acid again.

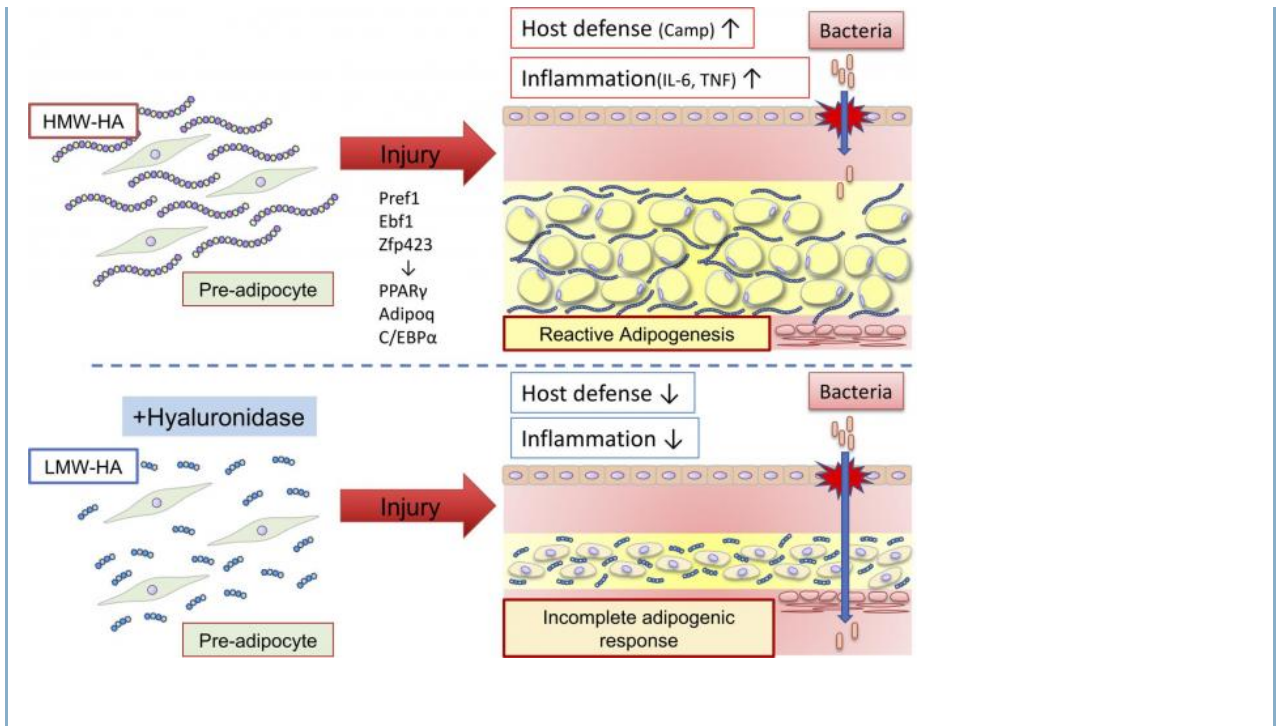

How to use hyaluronidase for injection

The concentration of hyaluronic acid is 1500U. There are many ways to dissolve it, depending on the doctor's preferences. The dissolution methods commonly used by some experts are as follows: 1500 IU (a hyaluronic acidase) 3 ml of sodium chloride for injection → divided into 10 groups → can dissolve 10 ml of hyaluronic acid; the amount of specific injected enzyme is injected according to the amount of hyaluronic acid injected.

Hyaluronic acid lyase, also known as hyaluronidase or "Hyaluronidase for Injection", is a kind of enzyme that can hydrolyze hyaluronic acid.
