Water Syringe Injector ---- The injector gun was developed for water mesotherapy - hyaluronic acid is injected into the skin to solve any problems caused by the lack of moisture.
Function---- It makes the skin smooth, soft, radiant and hydrated after the injection. In addition, it is also suitable to inject various skin care products
Color OLED display---- It can provide a complete vision from all angles. Removable docking vacuum handle makes the water easier injection more convenient
Effective Beauty Device---- The recommended injection technique is the micro-puncture technique, in which very small amounts of hyaluronic acid, VC or other skin boosters are injected into the deep dermis, about 1-2 cm apart
2 Types of Storage Keys---- M1 for water mode, which can shrink pores and block moisture, M2 for hyaluronic acid mode, which can help the skin to remove cosmetic residues
