Description

DERMAPLANING

Dermaplaning

- Manual exfoliation technique
- Removes surface debris with custom dermaplaning blade

Benefits of Dermaplaning

- Increase absorption of topical products
- Immediately diminishes the appearance of fine lines and wrinkles
- Primes skin for chemical peel
- Creates healthier, more radiant appearance

Dermaplaning Blade

Cincinnati Surgical, Swann Morton, and Lance Size 10 surgical dermaplaning blades.

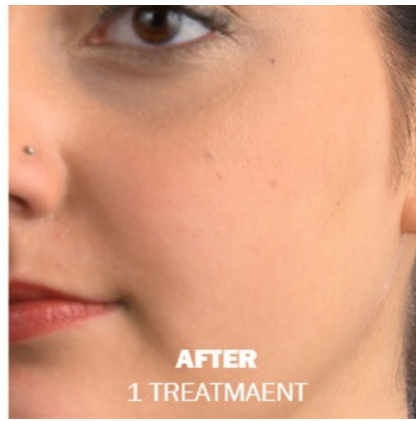

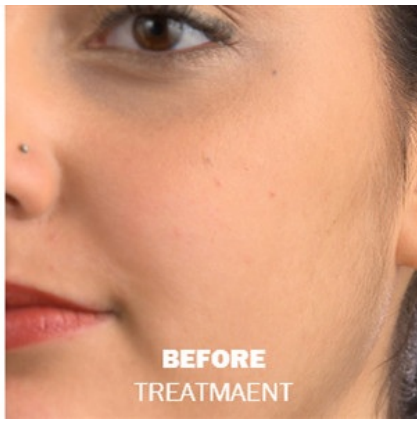

Fits Size 3 Handles.

Available Options:

- Carbon Steel, Sterile
- Stainless Steel, Sterile

Suitable for Dermaplaning and More – Sterile & Individually Foil Wrapped

This procedure helps to exfoliate the skin's top layers through a method of controlled surgical scraping. Dermaplaning can be performed on small areas of skin or on the entire face and can be used alone or in conjunction with other procedures such as a chemical peel, microdermabrasion, or fluorescent-pulsed light (FPL).

Dermaplaning, when performed prior to other treatments, can remove the "peach fuzz" which can trap excess dirt and oil. It is non-invasive and helps make other skin treatments more effective. Set of 2 high carbon steel scalpels #22 with plastic handle and blade guard. Can be used for crafts, surgery, in laboratories and much more. Individually foil wrapped to ensure sterility and prevent accidental punctures. These medical disposables are sterilized by gamma radiation, sterility is guaranteed if foil is not broken.
