Product Description

Neuramis Deep (1 X 1ml) Lido - My Lip Filler Hyaluronic Acid Wrinkle Fillers

Product Description

Immediate deep wrinkle removal with Neuramis Deep

The main goal of Medytox's Neuramis Deep Lido is to smoothen and soften the skin of the face, neck, décolleté and the back of the hands. It easily makes that happen because it is rich in purified Hyaluronic Acid (HA). The latter has amazing anti-wrinkle abilities because its HA gel retains moisture in the skin and, at the same time, it also hydrates it. As a rule, a skin that has a healthy hydro balance also looks more youthful and refreshed. The filling effect of Hyaluronic Acid, on the other hand, delivers instant middle and deep wrinkle removal results when it is injected in the skin.

Manufacturer: Medytox (South Korea)

Gel producer: Shiseido (Asia)

3% lido

20mg/ml of HA

Injection depth: Middle & deep layers of the skin

A reliable facial contouring filler and lip injection

The second specialty of Neuramis Deep Lido is to offer balanced facial sculpting to patients who want to reduce saggy skin, correct the proportions or shape of a certain part of their face, etc. That is why it is a reliable soft-tissue filler injection for:

Nose bridge reshaping

Chin enhancement

Cheeks augmentation

Jaw contouring

Neuramis Volume Lido for non-surgical skin rejuvenation

This is one of the most universal HA fillers by Medytox. It is equally effective at providing speedy severe wrinkle correction as it is at delivering unmatched facial sculpting because it has both a filling and a volumizing effect. Neuramis Volume Lido immediately fills facial depressions in the deep layers of the skin such as severe folds and it also added volume under the skin. The latter is very important because, with age, the face loses its natural volume leading to saggy skin, facial depressions and poor contour of zones like the cheeks and the chin. When applied in the perioral area, it delivers low-risk lip enhancement which remains visible for about 6 months. Board-certified cosmetic surgeons can also rely on this one-of-a-kind skin filler injection to painlessly correct a patient's nose bridge.

Top advantages of this world-class volumizing filler

Produced through an innovative S.H.A.P.E. Technology

Longer-lasting (6-12 months)

Contains lido for a pain-free treatment

Fully biodegradable and non-animal based

Easy to inject

No severe side effects

Excellent quality and guaranteed safety
