Packing	10 vials x 5ml
Shelf life	3 years

How do I use this product?

Because dermal fillers is a medical device, it should only be administered by a registered medical professional. Additionally, the injector must be trained in correcting facial volume imperfections.

dermal fillers should be injected into the deep dermis using a tunneling or threading technique in a cross-hatch pattern. The treated areas should be massaged after the injection to distribute the product evenly and prevent the formation of nodules.

Please note that this suspension can be mixed with lido to reduce discomfort and pain from the injection.

Usually, treatment with dermal fillers consists of 3–4 injection sessions spaced 3 weeks apart. After this, results can last for up to 2 years.

How long will the treatment take?

dermal fillers takes 30 to 60 minutes to be administered. For optimal results, patients should abstain from alcohol in the days before receiving this treatment. After the treatment, patients may immediately return to their daily activities.

What can I use it for?

dermal fillers is used to stimulate collagen growth in the skin, where it restores facial volume to reduce the look of depressions, scars, wrinkles, and folds. It can be used on skin that has suffered a great deal of collagen loss due to the aging process or health concerns.

What areas should I use this product on?

dermal fillers may be used in the following areas:

- Hollows in the cheeks, temples, jaw, under-eye area, and chin;
- Nasolabial folds;
- And marionette lines.

How long do the results last?

The volume-enhancing results of using dermal fillers appear 4 to 6 weeks after treatment and last up to 2 years.
