#### Box content:

2 vials syringes x 5 ml Poly-L-lactic acid

#### Action of dermal fillers dermal filler:

The main ingredient in dermal fillers is Poly-L-lactic acid, which stimulates the production of collagen by the skin cells in a natural way. As a result, your skin looks radiant and rejuvenated. The injectable gel is biocompatible and completely biodegradable, which makes dermal fillers safe to use, non – invasive and non – surgical option for restoring collagen loses in the skin and correcting any occurring facial depressions.

#### Treatment plan with dermal fillers:

This facial injectable by Sanofi Aventis works gradually, so a couple of consecutive treatments with the solution are required for optimum results. Normally, 3 injection treatments within a period of 4 to 6 weeks are necessary in order to achieve a more natural, youthful look. However, the number of required procedures can vary for each individual patient. You will be advised on sessions required for your personal needs by your practitioner.
