## Product Description

### Injectable Placentex Pdrn Skin Regeneration Injection Filler Solution

Placentex Information:

Placentex 5,625mg/3ml (Polydeoxyribonucleotide,PDRN), a deoxyribonucleotide polymer used for rejuvenation and anti-inflammatory properties that helps healing of cutaneous wounds, boosting of neocollagenesis of photo aged skin, moisturizing dry skin, burned scar repair, lighten skin tone and skin regeneration of the cells. Use with Dermapen or dermaroller for maximum effect.

Selling a box of 5 Highly concentrated: 5.625mg per 3ml per bottle.

Placentex Italian Salmon Needle is a product of the Italian MASTELLI pharmaceutical factory.

It mainly contains PDRN ingredients. PDRN is a regeneration factor, which is a great help for skin and tissue regeneration. It not only has a calming effect on the skin, but also has an excellent effect on the healing of face wounds. Because it can promote the growth of cells like a baby, it is called "baby needle". PDRN needles can also be used for intramuscular injections. In addition to enhancing metabolism and improving skin efficacy, it can also enhance sleep and improve hair loss. It is also used for clinical treatment of diabetes and foot ulcers.
