

dermal fillers Face Filler poly l lactic acid Derma Filler Plastic Facial Surgery

Basic Information

- Place of Origin: italy
- Brand Name: 150mg/5ml
- Certification: ce
- Model Number: 150g
- Minimum Order Quantity: 1 pcs
- Price: 35
- Packaging Details: one bottle/box
- Delivery Time: 3-5day
- Payment Terms: T/T, Western Union, MoneyGram, credit card, paypal

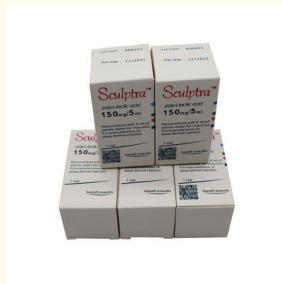

Product Specification

- Material: Poly L Lactic Acid
- Shelf Life: 2 Years
- Product Name: Dermal Fillers Poly l Lactic Acid Stimulates Collagen
- Grade: Injection Grade

Product Description

PLLA poly l lactic acid 150g/5ml Anti Aging Wrinkle dermal fillers dermal filler injection

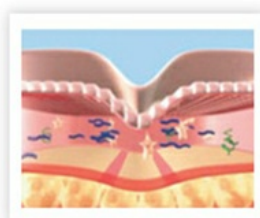

Our Product Introduction

What Is dermal fillers® Aesthetic?

Facial fat loss (lipoatrophy), is an age-related condition that can result in prominent facial folds, sunken eyes, and hollow cheeks. dermal fillers® Aesthetic targets these areas to correct shallow to deep facial wrinkles and folds. The treatment is suited to nasolabial folds (smile lines) between the nose and mouth, the lines framing the mouth (marionette lines), and wrinkles in the chin.

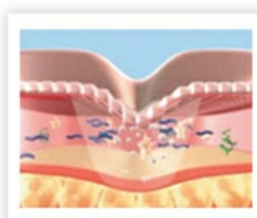

dermal fillers® is made from a biocompatible substance known as poly-L-lactic acid, a synthetic version of the substance naturally produced by the body during exercise. Because dermal fillers® is not derived from human or animal products, no skin test is required.

Wrinkle before treatment

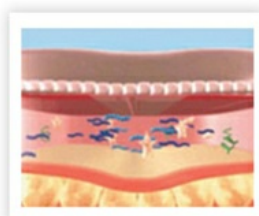

The injected volume immediately fills out the wrinkles and volume defects

Within a few days, the water in Sculptra is absorbed by the body with a slight increase in wrinkle depth

The 2nd phase consists of a natural, soft build-up of the connective tissue, smoothing out wrinkles and contour defects

After approximately 6 weeks clear improvement can be seen. Larger volume defects may involve further Treatment

spec

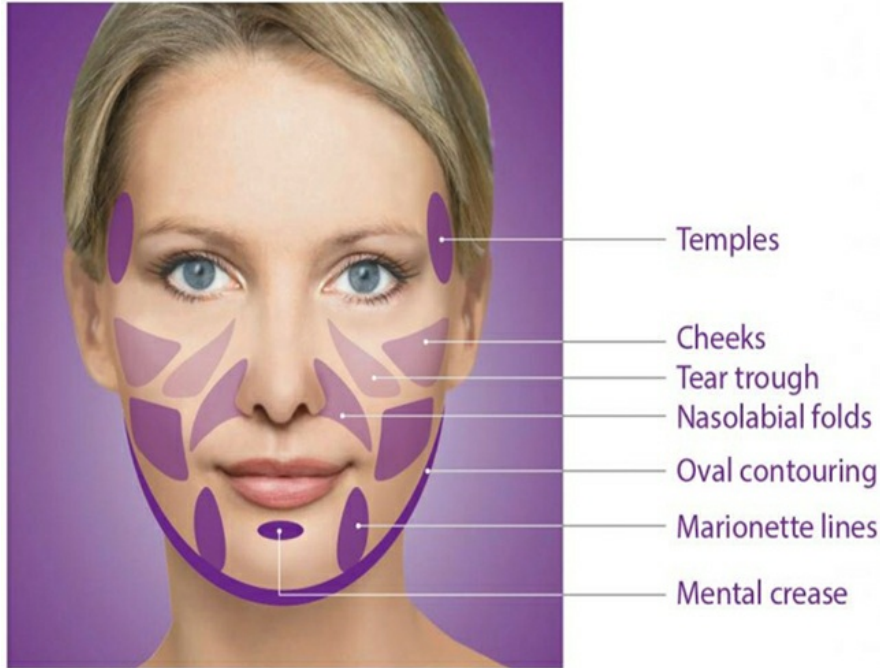

Product Name	dermal fillers Poly l Lactic Acid Stimulates Collagen derma filler
Ingredient	Chemical, Poly-L-Lactic Acid/PLLA
Apply for	Injectable dermal fillers
Material	Poly-L-Lactic Acid
Keywords	Anti-Aging Plastic Facial Surgery dermal fillers

for more products please visit us on hadermal-filler.com

Function	Demal Filler Anti-Aging
Function	Filling Wrinkles
Shelf Life	2 Year
Trademark	dermal fillerss
Specification	5ml

HOW DOES dermal fillerss AESTHETIC WORK?

dermal fillerss Aesthetic is made with biocompatible, biodegradable, synthetic material called poly-L-lactic acid, which is gradually and naturally absorbed by the body and helps to rebuild lost collagen through a series of treatments administered by a trained specialist. The specialist injects treatment within the deep dermis, where strands of collagen support your skin's structure. Over time, dermal fillerss Aesthetic helps the body reproduce lost collagen.9-11 The number of injection appointments and the number of injections per appointment vary from person to person, depending on how much collagen has been lost. On average, three injection appointments are needed over a period of a few months.

Results appear gradually and can last up to two years.

As a poly-L-lactic acid (PLLA) collagen stimulator, dermal fillerss Aesthetic helps restore the deep, underlying structure of the skin to diminish facial wrinkles.

dermal fillerss Aesthetic works with your body within the deep dermis to help revitalize collagen production and help restore your skin's inner structure and volume.

As the dermal fillerss Aesthetic PLLA microparticles are absorbed, they help stimulate collagen production.

Rebuilt collagen strands begin gradually helping to restore facial volume and the look of fullness to wrinkles and folds.
