Product Description

Facial Skin Care Dermaheal SB Mesotherapy Ampoule Serum 10 x 5 ml For Anti Aging

Dermaheal SB is a skin brightening, anti-pigmentation treatment containing active ingredients to resolve skin discolouration. Encapsulated Arbutin and Licorice extract blocks the conversion of L-DOPA to eumelanin and pheomelanin by inhibiting the enzyme tyrosinase. Noticeable effects on the reduction and prevention of hyperpigmentation by decreasing the melanin synthesis. 10ppm of each biomimetic peptide per vial.

Benefits:

The mesococktail effectively treats pigmentation caused by UV radiation and fights age spots on the skin.

Reduces hyperpigmentation by blocking melanin synthesis; restores skin, promotes the formation of collagen, elastin and hyaluronic acid.

Consists of biomimetic peptides. Nanocapsules penetrate the dermis and directly affect fibroblasts.

It is safe – it does not cause allergies, since the peptides are completely identical to human peptides, the only difference is that they are synthesized using biological engineering.

Peptides undergo the highest degree of purification and stabilization; they are completely safe and effective in protecting cells from the harmful effects of free radicals on them.

The skin is rejuvenated from the inside by activating its own “sleeping” resources.
