#### Advantages

Injectable poly-L-lactic acid (PLLA) is a synthetic, biodegradable polymer device approved in the United States for use in immunocompetent patients as a single regimen of up to four treatment sessions for correction of shallow to deep nasolabial fold contour deficiencies and other facial wrinkles. To correct fine to deep wrinkles and ageing skin. It is suitable for correcting marionette lines (vertical lines between the mouth and chin) and nasolabial folds (smile lines or laugh lines). It can be used to improve volume loss in facial areas such as the jawline, cheeks, and te

#### dermal fillerss plla lactic acid

dermal fillerss Aesthetic is an injectable implant containing microparticles of poly-L-lactic acid (PLLA), carboxymethylcellulose (USP), non-pyrogenic mannitol (USP) and sterile water for injection (USP). dermal fillerss Aesthetic is available in 367.5 mg dose vials and is to be reconstituted prior to use by the addition of 5 mL of Sterile Water for Injection, USP (SWFI) to form a sterile nonpyrogenic suspension.

After 2 or 3 treatments that are separated by intervals of 4 or 6 weeks, patients will notice a natural and youthful difference in their skin. The effects of dermal filler can last for as long as 2 years. After 2 or 3 treatments that are separated by intervals of 4 or 6 weeks, patients will notice a natural and youthful difference in their skin. The effects of dermal filler can last for as long as 2 years. Collagen levels are increased within the body to restore their natural function. Collagen is a type of fat which can be lost overtime resulting in saggy skin lacking firmness

- This treatment creates the opposite effect and reverses any loss by restoring it. After 2 or 3 treatments that are separated by intervals of 4 or 6 weeks, patients will notice a natural and youthful difference in their skin. The effects of dermal filler can last for as long as 2 years.

#### Used For?

**The areas commonly treated with dermal fillerss include: the temples, the mid cheek region and the lower face for hollowing, depressions, fine lines and jowling. dermal fillerss can be evenly distributed in all of these areas or focused injections can be performed in specific target regions. dermal filler is an cosmetic filler that can be used to restore facial volume lost due to aging or illness. It contains poly-L-lactic acid (PLLA), a biocompatible synthetic substance that stimulates collagen production. It can be used to treat deep lines, creases, and folds to give a more youthful appearance**
