Product Description

Juvederm Lip Filler Voluma Hyaluronic Acid Dermal Filler For Face

Juvederm fillers typically last six to 18 months. Their longevity depends on which formula you get and how much your injector uses.

Ultra XC and Volbella XC can last up to a year

Ultra Plus XC can last a year or more

Vollure XC can last up to 18 months

As a general rule, filler endures longest in areas with thinner skin and not much movement.

Fillers gradually and predictably resorb over time, allowing for a natural and symmetrical appearance in most cases, says Dr. Shah.

One big factor in longevity is how quickly your body metabolizes it. "If you have a fast metabolism, you may notice the filler go away sooner," says Dr. Nima Shemirani, a facial plastic surgeon in Beverly Hills, California. "On the bright side, after two to three rounds of injections, you'll notice it will last longer and longer."
