How does the treatment work?

The treatment can be done in 15 minutes but it can also take longer, depending on the area to be treated.

The professional in charge of your treatment injects the product using an ultra-thin needle under the surface of the skin. For fine lines, the product is injected at the surface of the skin. For marked wrinkles, the injection is made at a deeper level.

Please note that the injection of Juvéderm Ultra requires a medical gesture that can only be carried out by a doctor (doctor specialised in dermoesthetics, dermatologist or plastic surgeon).
