White to almost clear, vacuum-dried powder is a colorless and transparent vial. You will see a tiny white ring of powder on the bottom of the bottle.

NABOTA for people who get used to injecting Botox, when regular botulinum toxin is not working well anymore,

Nabota is stronger than Botulax.

To temporarily improve moderate to severe globallar wrinkles related to eyebrow wrinkle muscle (corrugator muscle) and/or procerus muscle activity in adults aged from 20 to 65.

Muscle spasticity: upper limb local muscle spasticity related to stroke in adults aged 20 or more.

Benign essential blepharospasm in adults aged 18 or more

To treat foot deformities due to spasticity in pediatric cerebral palsy patients aged 2 or older

Exp. Date 36 months from the manufacturing date

How does Allergan Botox work?

Allergan Botox acts by temporarily paralyzing the muscles. Therefore, people with such muscles or nerve problems benefit from it. Let's look a bit closer at how it works. Botox is inherited from neurotoxins. They work by targeting the nervous system and disrupting the mechanisms of nerve signaling to stimulate muscle contractions. This leads to muscles becoming temporarily paralyzed.
