Product Description

Botulax 100 Units is Botulinum Toxin Type A Anti Wrinkle Injection

Botulax 100 Units

Our

Botulax 100 Units is Botulinum Toxin Type A that they inject into facial muscles to help eliminate causes of expression wrinkles. Successfully used for [hyperhidrosis](#) (increased sweating), blepharospasm, and correction of deep [wrinkles](#). A white transparent injectable dry micro powder in a transparent glass vial which should become a colorless, transparent liquid when reconstituted with a solvent (saline solution). Vial is not empty!

Botulax 100U Benefits

Faster results, minimal pain white injection procedure.
 Stable toxicity, Proven therapeutic equivalence with Botulinum Toxin
 Natural result not affecting adjacent muscles and facial expressions
 Preservation of natural facial expressions against the background of complete correction of wrinkles.
 Worldwide recognition, manufactured in 23 countries under various commercial names.
 Credibility and high production standards by the Korea pharmaceutical HUGEL Inc.

How Do Cosmetic Injections Work?

When our faces are animated by our expressions, including frowns, surprise, and smiles, we develop forehead lines, brow furrows, crow's feet, and bunny lines (the vertical lines across the bridge of the nose). To combat this, Botulax temporarily paralyzes the corrugator, procerus, and orbicularis oculi muscles, all of which are responsible for horizontal surprise lines on the forehead, deep furrows—sometimes called “elevens”—between the brows, and crow's feet.

Botulax 100 Results

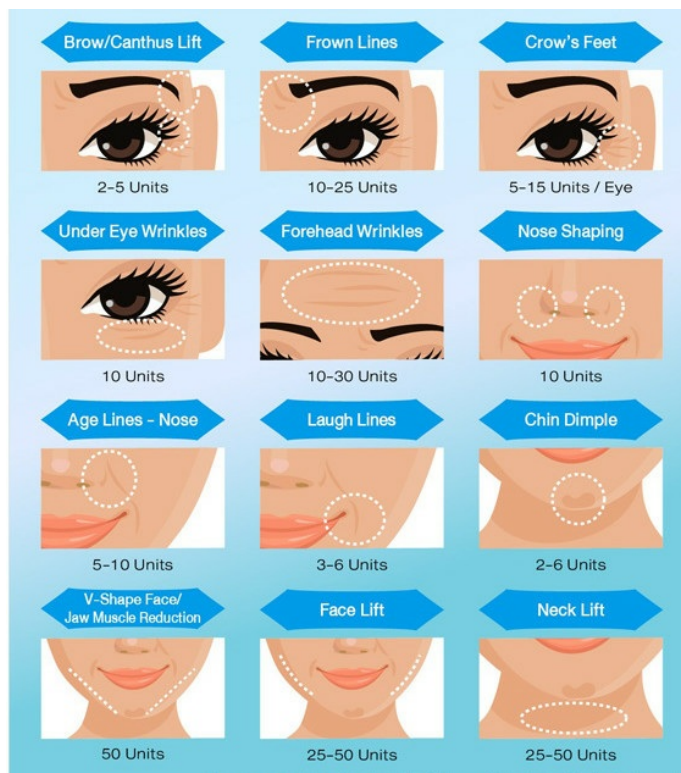

Eliminate deep lines and wrinkles caused by dynamic muscle movement for 6 – 8 months. Removes deep forehead worry lines, glabellar lines (deep lines between the eyebrows), turkey neck caused by platysmal bands, crows feet, etc.
 Stop excessive sweating (also known as hyperhidrosis) – no more underarm sweat rings, sweaty palms, embarrassing excessive sweating through your clothes, etc to worry over!

So, how to use Botulax Botox?

Apply it on face and neck.
 Cosmetic effect with Botulax 100 Units injections is obvious after 3-7 days
 Duration of the effect is approximately 6-9 months
 As a rule, 2-3 procedures are necessary per year, because muscle tone is restored over time.

How does Allergan Botox work?

Allergan Botox acts by temporarily paralyzing the muscles. Therefore, people with such muscles or nerve problems benefit from it. Let's look a bit closer at how it works. Botox is inherited from neurotoxins. They work by targeting the nervous system and disrupting the mechanisms of nerve signaling to stimulate muscle contractions. This leads to muscles becoming temporarily paralyzed.

specifications

product name	Botulinum Toxin
