

Toxta 100 IU Injections Anti Wrinkle Around Eyes

Our Product Introduction

for more products please visit us on hadermal-filler.com

Basic Information

- Place of Origin: usa
- Brand Name: toxta
- Certification: ce
- Model Number: toxta 100iu 200iu
- Minimum Order Quantity: 1
- Price: 40
- Packaging Details: 1 Vial/Box
- Delivery Time: 3-5day
- Payment Terms: Western Union, MoneyGram, T/T/credit card/paypal
- Supply Ability: 1000/day

Product Specification

- Use: Wrinkle
- Usage: Injection
- Product Name: Toxta 100iu Injection
- Package: 1 Vial/Box
- Product Brand: Allergan Innotox Hutox Nabota Botulax
- Content: 100iu
- Type: A
- Highlight: 100 IU Botulinum Toxin Injections, Anti Wrinkle Botulinum Toxin Injections

Product Description

Toxta 100 IU Type Anti Wrinkle Injection
Toxta 100 IU Type Anti Wrinkle Injection

Our

Toxta is a peripheral muscle relaxant that contains purified type A (in combination with haemagglutinin) and sodium chloride (excipient). The mechanism of action of the drug is based on the ability of botulinum toxin type A to block the transmission of nerve impulses. Intramuscular injection of the toxin disrupts the synthesis of acetylcholine (the neurotransmitter that provides neuromuscular transmission) and leads to temporary paralysis of the facial muscles. Reducing facial expressions helps to relax the face and smooth out wrinkles and prevent the appearance of new ones.

Main benefits:

Effects on wrinkles on the forehead, around the eyes, between the eyebrows: Smooths wrinkles by inhibiting muscle movement and prevents further wrinkles from forming.

Safe use: Toxta 100U is made from an original botulinum toxin strain from the European National Institute and is cGMP compliant. Low protein content leads to a low risk of immune resistance.

High purity for a faster and more consistent result: High purity (99.8%) and high biological activity ensure fast and consistent results.

Application area:

Mimic wrinkles on the forehead, between the eyebrows and the nasolabial triangle

Eyelid spasm (involuntary contractions of the circular muscle in the eye)

Horizontal and vertical neck wrinkles

Correction of the lip contour (botulinum toxin injections smooth out the curvature of the lips)

bruxism

treatment of hyperhidrosis

Packaging: The drug is produced in the form of a lyophilisate (white powder, which is used to prepare a solution for injection), in glass, tightly closed vials with a volume of 100 units. It should be diluted with 0.9% saline solution.

How does Allergan Botox work?

Allergan Botox acts by temporarily paralyzing the muscles. Therefore, people with such muscles or nerve problems benefit from it. Let's look a bit closer at how it works. Botox is inherited from neurotoxins. They work by targeting the nervous system and disrupting the mechanisms of nerve signaling to stimulate muscle contractions. This leads to muscles becoming temporarily paralyzed.

specifications

product name	
how to use	injection
saline	3ml
use	Wrinkle/thin face
size	100iu 150iu 200iu
brand name	Allergan Innotox hutox Nabota Botulax Botox
packing	1 Vial/Box
effect	6month-1year
delivery time	3-5day
