Product Description

Hyaluronic Acid Injection Neuramis Deep volume filler for lip filler

Korea Neuramis Deep Volume Light Ha Derma Filler Injectable for Face Lip 1ml

Fillers NEURAMIS Medytox

Hyaluronic acid (HA) is a natural element of our body and fulfils important functions such as maintaining moisture, firmness and elasticity in the skin. Environmental factors such as excessive and intensive sun exposure, and the natural ageing process contribute to the depletion in the body's own level of hyaluronic acid. The skin becomes drier, thinner, and loses suppleness and elasticity. Lines and wrinkles appear. Volume decreases and changes the overall harmony of the face.

How do I select model type:

Neuramis Meso: With the smallest particles for the correction of very thin, superficial lines.

Injected in the upper part of the dermis.

For correction of thin superficial lines, such as worry lines, periorbital lines, perioral lines.

Neuramis Light Lidocaine: With the smallest particles for the correction of very thin, superficial lines.

Injected in the upper part of the dermis.

For correction of thin superficial lines, such as worry lines, periorbital lines, perioral lines.

Neuramis Lidocaine: With the smallest particles for the correction of very thin, superficial lines.

Injected in the upper part of the dermis.

For correction of thin superficial lines, such as worry lines, periorbital lines, perioral lines.

Neuramis Deep: Medium particle size for moderate wrinkles.

Injected in the middle part of the dermis.

For treatment of moderate wrinkles, such as glabellar, oral commissures, Lips fullness, pouting and vermilion border.

Neuramis Deep Lidocaine: Medium particle size for moderate wrinkles.

Injected in the middle part of the dermis.

For treatment of moderate wrinkles, such as glabellar, oral commissures, Lips fullness, pouting and vermilion border.

Neuramis Volume Lidocaine: Larger particles for deep folds.

Injected in the deep layer of the dermis and/or the surface layer of the subcutis.

For correcting deep folds, creating fuller lips and shaping facial contours, such as cheeks and chin.

Neuramis product range is designed and established by Medytox, a Korean biopharmaceutical company that has developed Botulinum toxin type A. The company developed Neuramis – a dermal filler made from high-quality raw materials – based on the innovative SHAPE technology. This product is notable for its two-step cross-linking process and its enhanced refinement process. Additionally, it is praised for its ability to minimize uncross-linked BDDE.

spec

Neuramis is touted as being highly successful and efficacious for being a reliable hyaluronic acid dermal filler. Its users have widely praised the product for its versatility and its efficacy.

Neuramis is particularly helpful in correcting wrinkles, either deep and static or superficial skin wrinkles. Neuramis deep is one of the highest-rated lip fillers in the market that can give you a plump-looking lip.

It is popular among Hyaluran pen users since Neuramis work well on the Hyaluron pen as well as direct injecting.

Neurmais deep also adds volume to sunken areas and gives a youthful glow to your skin. The sophisticated feature of Neuramis Deep Lidocaine results in a highly purified product. The cross-linked HA structure guarantees a longer duration of effect, while its uniform distribution throughout the epidermis provides natural-looking results.

There are two types of Neurmais Deep fillers

With Lidocaine

Without Lidocaine

How does the treatment work?

The treatment can be done in 15 minutes but it can also take longer, depending on the area to be treated.

The professional in charge of your treatment injects the product using an ultra-thin needle under the surface of the skin. For fine lines, the product is injected at the surface of the skin. For marked wrinkles, the injection is made at a deeper level.

Please note that the injection of Juvéderm Ultra requires a medical gesture that can only be carried out by a doctor (doctor specialised in dermoesthetics, dermatologist or plastic surgeon).
