## Product Description

### CYTOCARE 532 715 516 skin booster Acide hyaluronique Revitacare Rejuvenating Complex

#### Product information

With Cytocare 715, the skin regains its plump, radiantly beautiful appearance. Signs of ageing and a decreasing tissue density of the skin can be efficiently and visibly reduced with this product. The high concentration of hyaluronic acid makes Cytocare 715 so effective. This product is not only suitable for already manifest wrinkles, but also when the first signs of skin ageing appear. In this way, the ageing process of the skin can be significantly slowed down. Thanks to the hyaluronic acid, the skin receives an extra portion of moisture directly into the tissue. The skin appears plump and has a youthful glow. First wrinkles are reduced, but also the renewed formation of fine lines is delayed by the treatment with Cytocare 715. The skin's elasticity increases and the hyaluronic acid improves skin regeneration. Pigmentation spots diminish and the skin becomes radiantly beautiful. Cytocare 715 is a mesotherapy product and is injected into the mid to deep dermis.

#### The Cytocare Product Range

Cytocare products provide a youthful appearance through the optimally balanced mixture of uncross-linked hyaluronic acid and a special rejuvenation complex. Highly moisturising treatment takes place through micro-injections. As a result of the special mesotherapy treatment, the skin is revitalisingly protected and wrinkles are reduced. Depending on skin type and age, the Cytocare range offers 4 different concentrations: 502(2mg)-516(16mg)-532(32mg)-715(75mg).

#### PREVENTION

#### CYTOCARE 502

- Preserves the youthfulness of the skin
- Delays the appearance of fine lines

**Content:**

5 ampoules of 5 ml each

The concentration is 75mg/ml.

**Effect duration:**

The duration of effect can last up to 3 months, but also up to 5 months for some clients. Consequently, this is conditioned by age, skin type, sporting activity and applied technique. In order to obtain a perfect result, we recommend that the Cytocare mesotherapy treatments are carried out at 3-month intervals.
