

Injections Innotox Nabota Botulax for Face Rejuvenation

Our Product Introduction

Basic Information

- Place of Origin: korea
- Brand Name: rentox
- Certification: ce
- Model Number: rentox 50iu 100iu
- Minimum Order Quantity: 1
- Packaging Details: 1 Vial/Box
- Delivery Time: 3-5day
- Payment Terms: Western Union, MoneyGram, T/T/credit card/paypal
- Supply Ability: 1000/day

Product Specification

- Use: Wrinkle
- Usage: Injection
- Package: 1 Vial/Box
- Product Brand: Allergan Innotox Hutox Nabota Botulax
- Type: Type A
- Use For: Wrinkle
- Administration: Intramuscular Injection By A Trained Medical Professional
- Application Type: Injection Technique Place
- Apply: Face
- Approval: FDA-approved For Cosmetic And Medical Use
- Color: White Powder
- Dosage: Varies Depending On The Treatment Area And Individual Needs
- Effect Duration: 3-6 Months

Product Description

Wrinkle 100iu 150iu thin face Innotox hutox Nabota Botulax

injections work by weakening or paralyzing certain muscles or by blocking certain nerves. The effects last about three to twelve months, depending on what you are treating. The most common side effects are pain, swelling, or bruising at the injection site. You could also have flu-like symptoms, headache, and upset stomach. Injections in the face may also cause temporary drooping eyelids. You should not use Botox if you are pregnant or breastfeeding.

Innotox / INNOTOX 50 units. is an innovative drug (botulinum toxin) type A developed by the South Korean company Medytox Inc.

This drug has gained great popularity in clinics in South Korea and Japan due to several advantages:

- 1) Structure of the drug: Innotox is available in a new liquid phase, so it does not require dilution. One bottle contains a ready-made product solution for 50 units.
- 2) Composition: the improved formula of the preparation does not contain: proteins, albumin, gelatin, compared with other similar drugs.
- 3) Temperature conditions: insensitive to temperature extremes, in contrast to solid-phase preparations. However, it is recommended that you keep it in the refrigerator until use. The opened bottle can be stored in the refrigerator at a temperature of 2 to 8 degrees 72 hours.
- 4) Diffusion: has the least diffusion among all botulinum toxins currently known.
- 5) Effect: during the course of procedures, the effect lasts up to 8 months, in contrast to other botulinum toxins, in which the effect lasts up to 4 months.

The active components are: botulinum toxin type A, L-methionine, polysorbate 20, buffered saline phosphate pH 7.0.

How does nabota work?

nabota acts by temporarily paralyzing the muscles. Therefore, people with such muscles or nerve problems benefit from it. Let's look a bit closer at how it works. Botox is inherited from neurotoxins. They work by targeting the nervous system and disrupting the mechanisms of nerve signaling to stimulate muscle contractions. This leads to muscles becoming temporarily paralyzed.

specifications

product name	
how to use	injection
saline	3ml
use	Wrinkle/thin face
size	100iu 150iu 200iu
brand name	Allergan Innotox hutox Nabota Botulax Botox
