## Product Description

### Neuramis Revolax Deep Fine Sub-Q (1 x 1.1ml) Hyaluronic Acid Dermal Filler

Revolax Sub-Q offer a smooth and pain-free experience in augmenting the facial features of the patient. The gel contains 0.1ml of Lido , which means any immediate discomfort, typical for a dermal filler injection procedure is not present.

The Revolax product is made from purified Hyaluronic Acid and its gel is monophasic in structure – an advantage, when compared to most filler brands, as its structure is more durable to the enzymes of the body and thus, its effects are more lasting. Revolax Sub-Q with Lido will last 6 months more, on average, compared to most other sculpting filler brands.

The filler has a very high concentration of Hyaluronic Acid – 24mg/ml. Considering how powerful it's effects on the skin are, it is no wonder this is an excellent anti-age product. While using synthetic HA, the substance itself is natural to the human body, with capability of retaining many times it's own weight of water, is completely safe and biodegradeable.

The primary focus of thick fillers is enhancing the shape of the various facial features of the patient. Revolax Sub-Q with Lido is no exception and it can help doctors improve the patient's:

Jawline  
Cheek volume  
Cheekbones  
Chin  
Nose (rhinoplasty)

Intended for:

Deep wrinkles  
Nasolabial folds  
Augmentation of the cheeks, chin and lips
