Basic Information

- Place of Origin: Korea
- Brand Name: Botox Nabota Hutox ReNtox Meditoxin
- Certification: CE
- Model Number: 100iu 150iu
- Minimum Order Quantity: 1 box
- Price: 37
- Packaging Details: box
- Delivery Time: 1-3day
- Payment Terms: T/T, Western Union, MoneyGram
- Supply Ability: 50000box/month

Product Specification

- Product Name: Botox
- Keywords: Innotox
- Type: 100iu 150iu
- Brand: Botox
- Others: Botulax
- Keyword: Meditoxin
- Keyword 1: Nabota
- Keyword 2: ReNtox
- Packing: 1 box
- Highlight: 200U Allergan Botox, 50IU Allergan Botox, Rentox Allergan Botox

Product Description

Skin Care Face Thin Botox 100IU 150IU A Botulinum Toxin Injections
Botox Nabota Hutox Botulax Botulinum Toxin Type A Injections Innotox 100iu 200iu Meditoxin

Our Product Introduction

Product information

1. Introduction:

– BOTULAX, Botulinum Toxin A is the number one non surgical cosmetic procedure for both men and women which is produced from fermentation of Hall strain Clostridium.

– Botulax 100 iu contains 100 units (U) of Clostridium botulinum toxin type A, 0.5 milligrams of albumin (human) and 0.9 milligrams of sodium chloride in a sterile, vacuum-dried form without a preservative.

BOTULAX is a peripheral muscle relaxant that contains purified botulinum toxin type A (in combination with haemagglutinin) and sodium chloride (excipient). The mechanism of action of the product is based on the ability of botulinum toxin type A to block the transmission of nerve impulses. Intramuscular administration of the toxin disrupts the synthesis of acetylcholine (a neurotransmitter that ensures neuromuscular conduction) and leads to temporary paralysis of the facial muscles. Frozen facial expressions help relax muscles and smooth wrinkles.

Product name	Botulax 100iu 200iu
Type	Botulinum Toxins type A
Stabilize	Human serum albumin 0.5mg
Tonic Adjuster	Sodium chloride (KP) 0.9mg
Active ingredient:	Clostridium botulinum toxins type A (100 units).
Shelf Life	3 years in freeze-drying conditions
Storage	Store at temperature of +2 to +8°C
Duration	6 month

ACTIVE INGREDIENT:

Clostridium type A botulinum toxin
(Strain: Clostridium botulinum CBFC26)
Dose: 100 units (U)

MODE OF ACTION:

Botulinum toxin type A blocks signals from the nerves to the muscles.
The botulinum toxin injected into the muscle can no longer shrink, which reduces wrinkles.
It is used for: forehead lines, crow's feet (wrinkles around the eye) and lion's wrinkle.

Horizontal and vertical neck wrinkles;

Lip contour correction

bruxisam

EFFECTIVENESS:

Botulax 100 iu guarantees high effectiveness.

The fluctuation in potency is tightly controlled in the range of 91-115 units

Botulax provides a precise and uniform effect at the time of injection, guaranteeing high patient satisfaction with the preparation
