Product Description

MAXY FILL is a Hyaluronic acid body filler used fortissue augmentation. It is recommended to be used for shaping the contours of the body and for the correction of folds and mid and/or deep depression of the skin. It should be injected into the deep layer of the dermis and/or the surface layer of the subcutis.

MAXY FILL could be perfectly dissolved through effect of hyaluronidase when the problems faced by increasing the cross-linking rate. Even though patients have unsatisfied results after injection, MAXY FILL can be completely removed by injecting hyaluronidase. That's because it is strong against natural hyaluronidase inside human body.

MAXI FILL Benefits:

- the product acts locally in the injection area because of optimal viscosity and cohesiveness
- the procedure is non-intrusive, does not need an anesthesia and promote long-lasting effect
- high quality and purity of the product is reached by application of the latest biotechnological methods
- the marks of injections are almost invisible even right after the procedure

So, how to use MAXY FILL?

Take a proper amount and apply it to the areas that need to be taken care of and absorb it.

MAXY FILL CAUTIONS IN USE
