**Product Description**

MAXY FILL is a Hyaluronic acid body filler used fortissue augmentation. It is recommended to be used for shaping the contours of the body and for the correction of folds and mid and/or deep depression of the skin. It should be injected into the deep layer of the dermis and/or the surface layer of the subcutis.

MAXY FILL could be perfectly dissolved through effect of hyaluronidase when the problems faced by increasing the cross-linking rate. Even though patients have unsatisfied results after injection, MAXY FILL can be completely removed by injecting hyaluronidase. That's because it is strong against natural hyaluronidase inside human body.

**MAXI FILL Benefits:**

- the product acts locally in the injection area because of optimal viscosity and cohesiveness
- the procedure is non-intrusive, does not need an anesthesia and promote long-lasting effect
- high quality and purity of the product is reached by application of the latest biotechnological methods
- the marks of injections are almost invisible even right after the procedure

**So, how to use MAXY FILL?**

Take a proper amount and apply it to the areas that need to be taken care of and absorb it.

**MAXY FILL CAUTIONS IN USE**

- In case of having side effects such as red rash, swollenness and/or itching while using this,

or in case such symptoms appear by direct sunlight after using it, consult a dermatologist immediately.

- Do not apply it on the part where you have a scar, eczema or dermatitis.

-Precautions for treatment and storage

1) Keep it out of the reach of children.

2) Avoid the place where the direct sunlight is.
