Product Description

Revolax Rejeunes Neuramis Crosslink Hyaluronic Acid Dermal Filler 1ml

What is hyaluronic acid dermal filler?

Injectable hyaluronic acid (HA) is a type of temporary dermal filler. Hyaluronic acid is found naturally through out the body, with the highest concentrations in the joints, eyes, and skin. In the skin hyaluronic acid attracts water, which allows the skin to become more hydrated. As we age, the fat, muscles, bone, and skin in our face begins to thin. This loss of volume leads to either a sunken or sagging appearance of the face, fine lines, wrinkles, folds, and thin lips. Injectable HA is used to reduce the appearance of fine lines and wrinkles, facial folds, and to create structure, framework, and volume to the face and lips. The effects of injectable hyaluronic acid are seen immediately.

Product Name	Deimalax Revolax Rejeuness Premum3 Neuramis Yvoires
Grade	Fine line / Derm / Deep / Ultra-deep
Single Package Size	22X11X4 cm
Usage	Injection
Concentration	24mg/ml
Type	1ml / 1.1ml / 2ml / 3ml / 5ml / 10ml / 20ml
Featura	Firming, Anti-wrinkle
Ingredient	Hyaluronic Acid
Single Gross Weight	0.5kg

Certification	CE

Dermal fillers have been used for:

Wrinkles
 Nasolabial folds
 Marionette lines
 Pre-jowl sulcus
 Lips
 Fine lines around the mouth
 Under the eyes
 Cheek augmentation
 Earlobes
 Volume loss on the back of hands

Benefits of Hyaluronic Acid Fillers

Stimulates collagen production
 Adds volume
 Smoothes texture
 Decreases the appearance of fine lines and wrinkles
 HA exists naturally in the body
 Lasts up to a year⁴

"Hyaluronic acid fillers add volume and decrease wrinkles all in one visit, with results that typically last six months to a year," Henry says. "HA fillers can stimulate collagen production, which leads to fresher-looking skin, and can be used for preventative reasons, to combat volume loss and fine lines earlier on in the aging process."

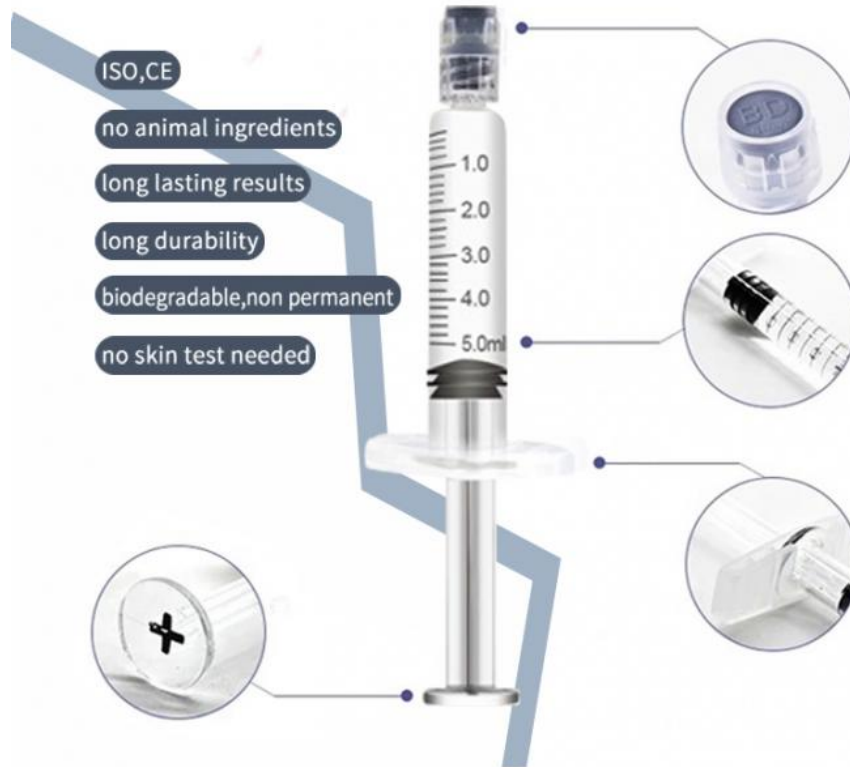

How Long Do the Results Last?

How long the effects of dermal fillers will last depends on the product, the area of treatment, and the patient. Generally

speaking, the denser the product is and the more deeply it is injected, the longer it will last. Hyaluronic acid fillers tend to be the most temporary option, and therefore are often recommended for first-time filler patients. These will typically last from 6 to 18 months.

Production

Longer Duration--Cross-linking process

Hyaluronic acid filler

Hyaluronic acid filler are fully absorbable highest viscosity dermal filler with largest particles for subcutaneous injections aimed at creating and shaping facial contours. Its long lasting results are ideal for creating or restoring lost volume in areas such as the cheeks and chin.
