### Product Description

#### Revolax Rejeunes Neuramis Crosslink Hyaluronic Acid Dermal Filler 1ml

#### What is hyaluronic acid dermal filler?

Injectable hyaluronic acid (HA) is a type of temporary dermal filler. Hyaluronic acid is found naturally through out the body, with the highest concentrations in the joints, eyes, and skin. In the skin hyaluronic acid attracts water, which allows the skin to become more hydrated. As we age, the fat, muscles, bone, and skin in our face begins to thin. This loss of volume leads to either a sunken or sagging appearance of the face, fine lines, wrinkles, folds, and thin lips. Injectable HA is used to reduce the appearance of fine lines and wrinkles, facial folds, and to create structure, framework, and volume to the face and lips. The effects of injectable hyaluronic acid are seen immediately.

#### Benefits of Hyaluronic Acid Fillers

Stimulates collagen production  
Adds volume  
Smooths texture  
Decreases the appearance of fine lines and wrinkles  
HA exists naturally in the body  
Lasts up to a year<sup>4</sup>

"Hyaluronic acid fillers add volume and decrease wrinkles all in one visit, with results that typically last six months to a year," Henry says. "HA fillers can stimulate collagen production, which leads to fresher-looking skin, and can be used for preventative reasons, to combat volume loss and fine lines earlier on in the aging process."

#### How Long Do the Results Last?

How long the effects of dermal fillers will last depends on the product, the area of treatment, and the patient. Generally speaking, the denser the product is and the more deeply it is injected, the longer it will last. Hyaluronic acid fillers tend to be the most temporary option, and therefore are often recommended for first-time filler patients. These will typically last from 6 to 18 months.
