Maxy Fill 70cc Buttock Butt Breast Filler Hyaluronic Acid Ha Dermal Filler Lasting Effec

Our Product Introduction

Basic Information

- Place of Origin: korea
- Brand Name: Maxy Fill
- Certification: ce
- Model Number: 70cc
- Minimum Order Quantity: 1
- Price: 95
- Packaging Details: 70cc
- Delivery Time: 3-5day
- Payment Terms: T/T, T/T, Western Union, Western Union,
- Supply Ability: 10000

Product Specification

- Material: Hyaluronic Acid
- Size: 70cc
- Use: Buttock Filler
- Trademark: MAXY Fill
- Shelf Life: 2 Years
- Highlight: **70cc hyaluronic acid dermal filler**, **buttock filler with lasting effect**, **breast enhancement HA filler**

Product Description

MAXYFILL BODY 70CC is a non-surgical injectable body filler primarily composed of cross-linked hyaluronic acid. It is designed for aesthetic enhancements, specifically for augmenting the volume of breasts and buttocks, as well as contouring other areas of the body such as thighs and legs. The product is manufactured by Quivermedic Co., Ltd., based in South Korea

Introducing our exceptional product, the High-Purity High-Viscosity Ampoule, formulated with pharmaceutical-grade high molecular hyaluronic acid as its primary ingredient.Hyaluronic acid, a natural high molecule abundantly found in the human body, boasts unparalleled moisture retention capabilities and plays a vital role in maintaining the skin's structure.

With an astounding moisture retention capacity, hyaluronic acid can hold up to 1000 times its weight in water, making it an ideal hydrating agent for various applications. It is abundant in skin cells, joint fluid, cartilage, eyeballs, and other tissues, underscoring its significance in promoting healthy skin and overall well-being.

As we age, the natural production of hyaluronic acid within the skin diminishes, leading to decreased moisture levels and a loss of elasticity.To combat this, high molecular hyaluronic acid can be obtained through dietary sources, but the quantity is relatively small, necessitating additional artificial replenishment for optimal benefits.

Our High-Purity High-Viscosity Ampoule comes in a convenient package, ensuring a seamless application process. Each box contains one vial, providing a generous 70cc of this remarkable formula.

Application Areas

MAXYFILL can be used in various areas including:

Breast Enhancements:For non-surgical correction of breast volume and shape.

Buttock Augmentation:To increase volume and symmetry.

Soft Tissue Restoration:Effective post-liposuction or for correcting irregularities.

Leg Contouring:Aiding in reshaping and correcting leg asymmetry.

Injection Details
The recommended injection depth is either subcutaneous or intradermal. Experts suggest administering between 30-40 cc per buttock while limiting breast injections to no more than 10 cc per session. The product comes in a vial containing 60 ml of gel, which allows multiple treatment sessions.

Aesthetic Effects and Longevity
The effects of MAXYFILL typically last between 12 to 15 months but can extend up to two years with proper care. Its unique formulation ensures minimal marks post-injection, maintaining a natural appearance.

Safety and Removal
One notable feature of MAXYFILL is that it can be easily dissolved using hyaluronidase if the results are unsatisfactory or if complications arise. This property makes it a safer option compared to permanent fillers.

High purity, high viscosity ampoule with high molecular hyaluronic acid as the main raw material.

Hyaluronic acid is a natural high molecule that is widely present in the human body with excellent moisture retention capacity and plays an important role in maintaining the skin structure.

• Excellent moisture retention capacity (1000 times its own weight)

• The largest amount in skin cells, including joint fluid, cartilage, eyeballs, etc

• Hyaluronic acid inside the skin reduces with age

• High molecular hyaluronic acid can be supplemented with food, but it is small in amount and needs to be replenished artificially.

- Replenishment of volume and correction of asymmetry of the buttocks

- Legs asymmetry correction

- Replenishment and alignment of soft tissues after volumetric liposuction

- Elimination of irregularities on the skin surface caused, for example, by liposuction

Sodium Hyaluronate
Hyaluronic acid is a natural high molecule that is widely present in the human body with excellent moisture retention capacity and plays an important role in maintaining the skin structure.

Excellent moisture retention capacity (1000 times its own weight)
The largest amount in skin cells, including joint fluid, cartilage, eyeballs, etc
Hyaluronic acid inside the skin reduces with age
High molecular hyaluronic acid can be supplemented with food, but it is small in amount and needs to be replenished artificially

Composition: HA 24mg/ml

PACKAGING: Box 70ml

The product is available only for professional users.
