Our Product Introduction

Product Description

Description

Main Efficiencies:
Hyaron effectively reduces fine lines, evens out skin tone, and improves skin texture.
The product can effectively fill out and hide wrinkles, making the skin look smoother and younger.
With regular use, Hyaron can lead to firmer, healthier, and more elastic skin.
Patients can enjoy excellent aesthetic improvements to their looks, as well as long-term improvements in skin hydration levels.
Hyaron can also whiten the skin and reduce speckles, resulting in a more radiant and youthful complexion.
Application Areas:
Dry skin
First signs of aging
Wrinkles
For glowing effect
Nasolabial folds
How to Use:
Hyaron is injected to a depth of 1 mm into the surface layers of the epidermis.
Hyaron gel is administered using a thin gauge needle (30G ½").
Usually the procedure is carried out in two stages. The first stage is a course of 4-6 procedures, which are carried out every 10 days. One procedure per month and a half is enough.
Anesthetic cream. The drug administration takes on average 40-60 minutes.
