Product Description

10ml Hyaluronic Acid Enlargement Products Breast Buttock Dermal Filler Injection

2ml Anti Wrinkle Hyaluronic Acid Facial Lip Dermal Filler

What is injectable hyaluronic acid?

Injectable hyaluronic acid (HA) is a type of temporary dermal filler. Hyaluronic acid is found naturally through out the body, with the highest concentrations in the joints, eyes, and skin. In the skin hyaluronic acid attracts water, which allows the skin to become more hydrated. As we age, the fat, muscles, bone, and skin in our face begins to thin. This loss of volume leads to either a sunken or sagging appearance of the face, fine lines, wrinkles, folds, and thin lips. Injectable HA is used to reduce the appearance of fine lines and wrinkles, facial folds, and to create structure, framework, and volume to the face and lips. The effects of injectable hyaluronic acid are seen immediately.

Hyaluronic Acid Dermal Injection Filler
