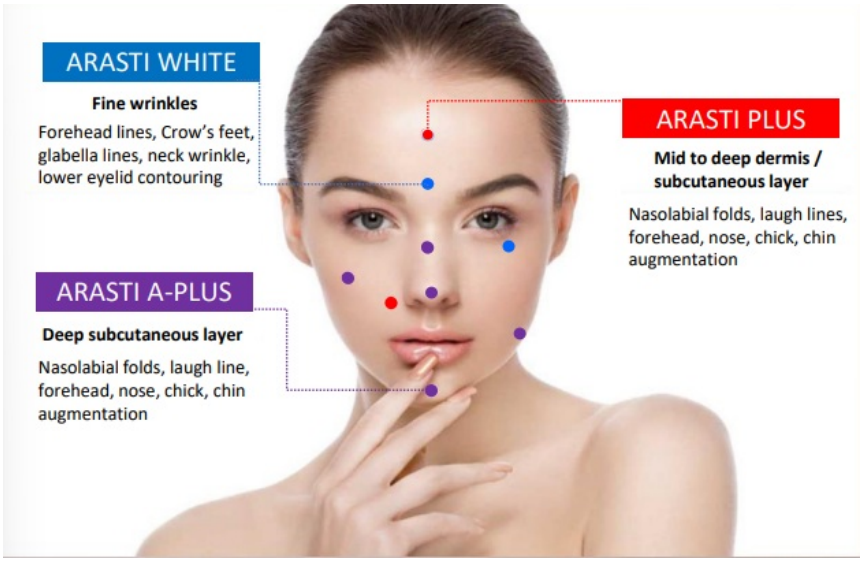
Product Description



Dermal Filler ARASTI

1. Performance
   - Hyaluronic acid is a high molecular substance composed of repeated disaccharides of N-acetyl glucosamine and glucuronic acid. ARASTI has realized a stable gel through precision cross-linking technology.
   - The stable structure of hyaluronic acid gel fills the space, supports the structure, protects the cells, replenishes the volume of wrinkled skin and keeps it natural.
2. Safety
   - The active ingredient used in ARASTI is non-animal. It is a human-derived component that is naturally decomposed over time with high-purity hyaluronic acid(European Pharmacopoeia level) applied to pharmaceuticals.
   - Hyaluronic acid cross-linking gel can be corrected through hyaluronidase when a problem occurs.
   - It is safe by providing the level of endotoxin and crosslinking agent below the detection limit through strict manufacturing process management.
3. Usability
   - Precisely designed handles and push rods keep the pressure at the time of injection evenly, enabling stable treatment.
   - The monophasic structure is a regular and stable gel structure, and it is a specialized technology applied to ARASTI that realizes natural volume and soft injection feeling.
4. Pain relief
   - ARASTI contains Lidocaine to improve pain-related discomfort during the treatment.

Dermal Filler
ARASTI

Product name	ARASTI WHITE	ARASTI PLUS	ARASTI A-PLUS
Cross-linking level	★☆☆	★★☆	★★★
