Product Description

Wrinkle Botulinum Toxin 100iu 150iu thin face Innotox hutox Nabota Botulax Botox Allergan

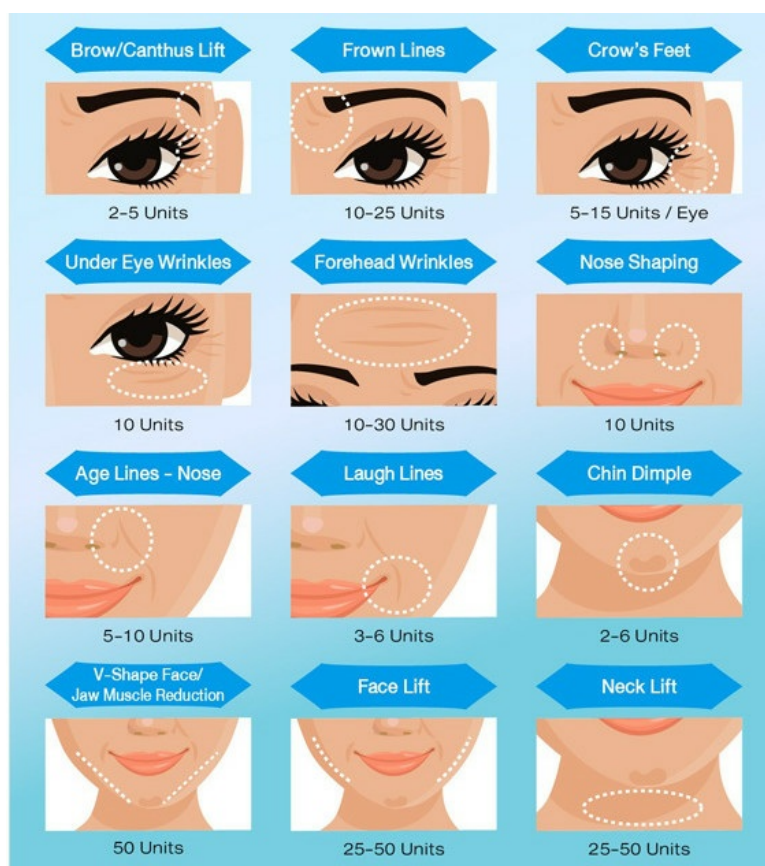

Allergan Botox is nothing but a bacterial derivation of C.botulinum. These bacteria are found in natural habitats such as the soil, the forest, the lake and the mammalian intestinal tracts.

Since C.botulinum bacteria are naturally obtained, they are normally harmless. In the clinical sense, this makes them a better choice.

How does Allergan Botox work?

Allergan Botox acts by temporarily paralyzing the muscles. Therefore, people with such muscles or nerve problems benefit from it. Let's look a bit closer at how it works. Botox is inherited from neurotoxins. They work by targeting the nervous system and disrupting the mechanisms of nerve signaling to stimulate muscle contractions. This leads to muscles becoming temporarily paralyzed.

specifications
