Product Description

Discover the innovative technology behind ELASTY PLUS fillers, crafted with a commitment to safety and quality. Made in Korea, these fillers utilize low-toxicity BDDE and unique cross-linking methods, ensuring reliability and efficacy. With CE certification and the added benefit of Lido for enhanced comfort, ELASTY PLUS offers a comprehensive solution for facial rejuvenation.

Hyaluronic acid, a key component in human skin and cartilage, is the star ingredient in ELASTY PLUS. Its exceptional moisture-attracting properties, absorbing more than 1000 times its weight in water, contribute to volumizing and hydrating the skin, fostering a plump and supple appearance.

ELASTY PLUS fillers feature cross-linked, highly purified hyaluronic acid derived from non-animal sources, guaranteeing safe and consistent results. Through advanced PNET technology, HA molecules are optimized for increased volume and elasticity, effectively targeting superficial wrinkles in facial, periorbital, and perioral areas.

Experience the advantages of ELASTY PLUS, including minimal procedure time, reduced bruising and swelling, and immediate return to daily activities. With its purified HA formulation, minimal risk of side effects, and suitability for thin and sensitive skin types, ELASTY PLUS stands as a premier choice for achieving natural and rejuvenated skin.

Storage Information

- Expiration date is indicated on the box.
- Keep away from direct sunlight.

Box of content

1ml x 2 Syringes

Manufactured in South Korea

Product purpose

D plus Filler allows filling in moderate to deep wrinkles around eyes, on the forehead, between the eyebrows, cheeks, marionette lines on other areas of face. It gently enlarges natural volume of tissues.

Description and composition

The product is released in 1ml syringes filled with gel containing hyaluronic acid (24 mg/ml)

The Hyaluron Pen is a revolutionary device that uses pressure to inject Hyaluronic Acid into the skin – with no needles, no pain, and no downtime. The Hyaluron Pen is a no-needle, no-pain treatment that creates plump lips, fixes smile lines, and create instant, long-lasting results. Not only is it needle-free and pain-free, but it also creates beautiful results in just minutes. Made in South Korea.

Application Area:

- Correction of the medium and deep wrinkles
- Correction of the nose and nasolabial folds
- Chin augmentation
- Forehead wrinkles smoothing
- Correction of glabella wrinkles

Main Ingredients:

HA(hyaluronic acid): 24mg/ml

Elasty G – dermal filler based on highly purified hyaluronic acid, developed by PNET (Preserved Natural Entanglement Technology). This technology is unique in increasing the cohesion coefficient of the molecules and, consequently, a stronger structure and longer lasting results. The product is used for the correction of medium and deep wrinkles and folds, volumizing and contouring.

Elasty G does not contain lido

Advantages of Elasty G

- High viscoelasticity
- Pronounced effect after the first treatment.
- Purified HA of non-animal origin
- Minimal risk of side effects, swelling, and allergic reactions
- Cross-linked HA fibres
- Suitable for thin and sensitive skin

Scope of Elasty G

- Correction of the fine lines and wrinkles
- Smoothing of the forehead wrinkles
- Nasal labial folds treatment
- Correction of neck wrinkles and wrinkles of periorbital area
- Lips augmentation

Composition (main ingredients)

HA 24 mg/ml

Duration

The effect of the procedure lasts from 8 to 12 months.
