Product Description

RADIESSE is recommended for adults between the ages of 35 and 60 with mild to moderate signs of aging who want to treat wrinkles, frown lines, and smile lines or who wish to add volume to their face. During a cosmetic consultation, your dermatologist can tell you if you are a good candidate for RADIESSE.

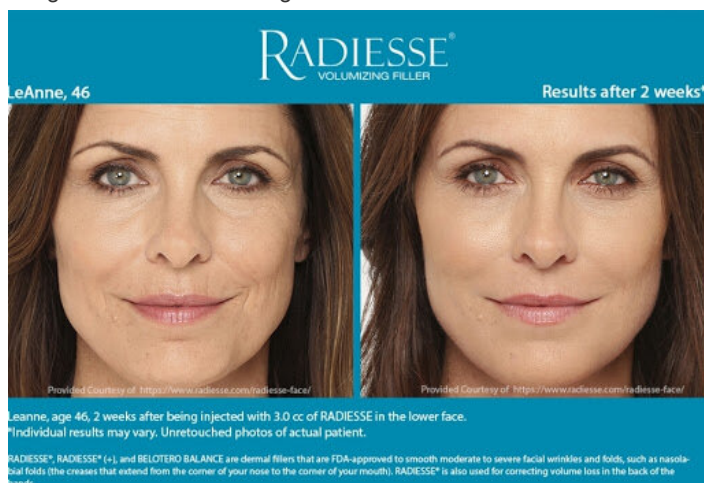

We often recommend RADIESSE for our patients who want to achieve one of the following goals:

- Correcting deep wrinkles and folds in the skin
- Filling in laugh lines, smile lines, and other wrinkles around the mouth
- Filling in wrinkles around the nose
- Reshaping the nose without the need for surgical intervention
- Filling in sunken cheeks
- Improving the appearance of scars
- Defining the jawline
- Improving the appearance of wrinkles or folds in the skin on the hands

During your consultation visit, you should review your health history with your dermatologist to ensure they're aware of any potential risks before you begin.

While the ingredients of RADIESSE are generally very easily tolerated by people with most skin types, you may not be an ideal candidate for RADIESSE if you have any of the following concerns:

- An allergy to any component of RADIESSE or to any other numbing medications
- History of severe allergic response, especially if your skin is hypersensitive
- Bleeding disorders
- Pregnant or breastfeeding mothers
