Product Description

Product Description :

Chaeum Premium is a series of dermal fillers containing highly cross-linked hyaluronic acid (HA). Special cross-linking technology used for production of Chaeum Premium fillers provides monophasic and even HA structure. Exceptional purity is achieved through prolonged dialysis of HA after the cross-linking reaction. Regular and dense gel structure ensures smooth and even distribution of the filler during injection and a natural-looking effect.

Strengths of Chaeum Premium:

low endotoxin content (<0.03 EU/ml) minimizes post-injection inflammation (redness, edema, painful and burning sensations)

low BDDE (<0.5 ppm) and protein (<0.05) loads reduce the risk of allergic reactions

constant extrusion force allows smooth and even injection, which makes the procedure easier, less painful and also reduces the risk of injury

the series contains products varying in the HA cross-linking rate depending on the scope of use

Chaeum Premium 1 is used for filling fine wrinkles. The filler has low HA cross-linking rate and is injected into the middle and superficial dermis.

Scope of Chaeum Premium 1:

glabellar lines

periorbital wrinkles (crow's feet)

perioral lines

lip contouring

skin rejuvenation

Product composition: HA, 24 mg/ml, Lido 0.3%
