Product Description

Meditoxin, a type A botulinum toxin developed by Medytox Inc., is renowned for its quality and safety. Wrinkles can develop in young women due to active facial expressions and become more pronounced over time, making them harder to treat. Meditoxin targets the underlying cause of wrinkles by relaxing overworked facial muscles, resulting in smoother skin due to its elastic properties. The effects of Meditoxin typically last between 4-6 months.

- Quick action – the effect is noticeable already on the 2nd day of the procedure and increases to 10 days
- Long-lasting effect
- Selective action
- High patient satisfaction

Application Areas:

- Smoothing pronounced vertical creases in the area of the eyebrows
- Elimination of crow's feet, wrinkles near the mouth, Venus rings on the neck
- Blepharospasm elimination
- Hyperhidrosis elimination
- Botox lifting

Main Ingredients:

Clostridium Botulinum Toxin A type (strain: Clostridium Botulinum CBFC26)

Packing Units:

1 vial 100 units/box

How does Allergan Botox work?

Allergan Botox acts by temporarily paralyzing the muscles. Therefore, people with such muscles or nerve problems benefit from it. Let's look a bit closer at how it works. Botox is inherited from neurotoxins. They work by targeting the nervous system and disrupting the mechanisms of nerve signaling to stimulate muscle contractions. This leads to muscles becoming temporarily paralyzed.
