

Product Description

Product description

E.P.T.Q. S100

E.p.t.q. is a word formed from 'Exquisite' and 'Technique'. E.p.t.q. is made for women who want to manage exquisite detail of beauty to achieve their true selves.

E.p.t.q. line consists of 3 fillers that cover the overall requirements and desired performance for dermal fillers. E.p.t.q. is a high-quality product that is produced accordingly to the manufactures process: "The 9 Essentials." Implying 9 criteria for the standards of the hyaluronic acids. This ensures e.p.t.q. can live up to the European safety standards like CE 2292 and KFSA. The base of e.p.t.q. is cross-linked hyaluronic acid. Cross-linking is a chemical process that links hyaluronic acid molecules to one another making the denigration slower than standard hyaluronic acid supporting a more youthfully and radiant skin.

E.P.T.Q. S300

Medium density filler, based on hyaluronic acid, purified stabilized, 300-conditional viscosity index, without lido .

Syringe volume: 1ml
Needles: 2 x 27 G1/2
Duration of effect: 6-8 months.
Production: South Korea.

Indications: Correction of deep irregularities of the skin profile (nasolabial folds, perioral wrinkles, wrinkles on the cheeks, puppet lines; increase in volume and correction of lip contours). Injection depth: medium / deep dermis.

E.P.T.Q. S500

High density filler, based on hyaluronic acid, purified stabilized, 500-conditional viscosity index, with lido and without.
Syringe volume: 1ml
Needles: 2 x 27 G1/2
Duration of effect: 6-8 months.
Production: South Korea

Indications: Correction of any age-related changes in skin relief (filling of deep folds), correction of facial areas with volume deficiency (zygomatic, chin and temporal areas). Injection depth: medium / deep dermis.

Ingredients

Hyaluronate Sodium (Conc.% < 3.0 %), water (Conc.% ≥ 95 %)

Product spection :

product name	E.P.T.Q filler
HA composition	24mg
volume	1ml

THE HYALURONIC ACID FILLER E.P.T.Q. PRODUCED ACCORDING TO TECHNOLOGY AND PROCESS OF JETEMA R&D CENTER PROMISES AN EXQUISITE AND SAFE QUALITY.

The e.p.t.q. filler produced according to "The 9 Process" promises an exquisite product that meets safety standards.

1. Safety of raw ingredients managed in exclusive lines
2. High purity HA content for duration and prevention of swelling
3. High viscoelastic for lift
4. Homogeneous particle implementation technology to complete sophisticated molding
5. No detection of residual chemical catalyst substance through the complete crosslinking process
6. Aseptic manufacturing environment to prevent side effects
7. Less than 0.1 EU/ml of Endotoxin
8. Minimizes pain with the same pH, osmotic pressure as the human body
9. Optimized injection pressure for sophisticated procedures
