Product Specification

- WhatsApp: +86-18132165209
- Highlight: 2 vials Sculptra,
Sculptra 2 vials for Radiant Skin, 5ml Sculptra

Product Description

HOW DOES SCULPTRA AESTHETIC WORK?

Sculptra Aesthetic works to target the underlying causes of the signs of aging such as collagen loss. Sculptra Aesthetic is a facial injectable that works gradually in a series of treatments – an average of 3 injection sessions over a period of a few months – to produce a refined, more youthful-looking appearance. During the course of your Sculptra Aesthetic treatments, collagen is replaced. Over time, you'll notice changes to your face that can last up to 2 years.

WHAT IS SCULPTRA AESTHETIC MADE OF?

Sculptra Aesthetic is made of a synthetic material called poly-L-lactic acid, which works to replace lost collagen. Poly-L-lactic acid is safe – absorbed naturally by the body – and has been used for years in dissolvable stitches.

WHAT IS SCULPTRA AESTHETIC?

Sculptra Aesthetic is the first facial injectable that can give you noticeable results that emerge subtly. It replaces lost collagen to give you a more natural-looking appearance without giving you away. A full treatment of Sculptra Aesthetic – on average, 3 injection sessions over a few months, can last up to 2 years.

Side effects of Sculptra Aesthetic may include injection site pain, redness, bruising, bleeding, itching, or swelling. Other side effects may include small bumps under the skin that are sometimes noticeable when pressing on the treated area. Larger lumps, with or without inflammation, have also been reported. Other side effects may include the delayed development of non-visible, small bumps under the skin sometimes noticeable when pressing on the treated area.
