Product Description

Elasty F - lasting wrinkle removal

The end result is one of the highest quality Korean dermal fillers on the market for the correction of fine lines and superficial wrinkles. A monophasic HA filler Elasty F has the advantage of correcting skin depressions in a very naturally looking manner.

One of the main advantages to most soft Hyaluronic fillers Elasty F has, is that this is a double pack of injectable HA gel. This allows dermatologists and other medical and / or beauty professionals to offer a more wholesale procedure for facial skin rejuvenation, correcting multiple areas in a single procedure, e.g., Crow's feet, Glabellar lines and skin depressions under the eyes (necessary amount will vary case-by-case).

ELASTY D filler allows you to fill moderate and deep wrinkles:

- around the eyes
- on the forehead
- between the eyebrows
- marionette wrinkles

Strengths of ELASTY G Dermal Filler:

- High stage purification process of hyaluronic acid
- Cross-linked fibers ensure a lasting effect
- Painless procedures
- Seamless and no-frills injections
- Easy to bring to the dermatologist
- Long biodegradation period (results can last up to a year)
