Product Description

**LIPORASE HYALURONIDASE: HYALURONIC ACID FILLER DISSOLVER**

Hyaluronic acid lyase, also known as Hyaluronidase, is an enzyme that hydrolyzes hyaluronic acid. Hyaluronidase can dissolve unwanted HA filler within 24 hrs. It results in a 90% elimination rate. This 1ml vial with powder requires saline water (included). One vial of this concentrated hyaluronidase powder, once mixed with saline, can make 3mls of filler dissolving solution. It is mainly used to remove or fix HA filler molding but it can also boost the effects of fat-dissolving solutions such as Mesotherapy Lipolysis. Store opened vials in a refrigerator or cold/dry area, never freeze.

Ingredients:

Hyaluronidase (EP) 1500 IU

Lactose Hydrate 13.3 mg
