### Product Specification

## Product Description

Nabota Botulinum Toxin Type A 100 units

A South Korean substance called Nabota is designed to reduce expression lines. It is a Botox-like muscle relaxant with peripheral activity. The substance is based on type A botulinum toxin. The bacteria Clostridium botulinum produces this toxic toxin. It is designed to denervate muscular tissue in situations where there is excessive muscle tone or dynamic facial expressions.

Area of application:

fold in the lips  
folded glabella  
zona periorbitale  
normalizes excessive perspiration in the armpits and palms

Clostridium botulinum toxin type A is a component.

Contains 100 Units

Storage: The product should be frozen (at a temperature lower than -5°C) or refrigerated (8-12°C).

Shelf Life: 36 months after the date of manufacture
