## Product Description

### Product Features

Kabelline Fat Reduction Solution is a contouring solution that helps to improve the appearance and profile of moderate to severe fat on the body. Kabelline products include the active ingredient synthetic deoxycholic acid. Deoxycholic acid aids in the breakdown of fat and its absorption; it is a naturally occurring body molecule. Fat is typically located in several key trouble areas like the chin, face, and abdomen.

Kabelline destroys fat cells in the chin area, which results in a noticeable and satisfactory reduction of redundant fat cells. Once these adipocytes (fat cells) are destroyed, these cells no longer can store and accumulate fat. Thus, further treatment is no longer required once your aesthetic goal has been targeted.

Kabelline is safely manufactured in Korea. It has obtained FDA certifications and is being exported to many countries worldwide.

### Benefits and Effects
