Product Specification

- WhatsApp: +86-18132165209
- Highlight: 10 syringe Hyaron Skin Booster, 2.5 mL Hyaron Skin Booster

Product Description

Haron skin booster is a unique mesotherapy product that combines the advantages of dermal filler treatment with mesotherapy. Made with sodium hyaluronate, this Hyaron mesotherapy solution has a gel-like consistency that is fluid and silky.

Because of its delicate nature, it can be used on skin types prone to blemishes as well as sensitive skin. The active ingredient of this product also helps enhance skin moisture levels, improving moisture retention and capacity. It stimulates the production of proteins such as collagen and elastin that promote skin elasticity.

Haron helps stimulate and hydrate skin cells, which helps to restore volume while offering the appearance of increased plumpness and volume. Moreover, it proves to be a successful way to reduce wrinkles, improve the general condition of the skin, and improve its appearance.

With the reduction in wrinkle size and frequency, this product gives patients a more youthful appearance. Hyaron's beneficial effects are noteworthy since they lead to longer intervals between therapy sessions. Also, with Hyaron prefilled injection, results become visible within 2 to 3 days after treatment.

Key Benefits of Hyaron

Haron injection, a skin enhancer, improves skin tone, consequently giving the skin an even tone. It also improves texture by addressing pigmentation issues.

With Hyaron Filler, wrinkles and other obvious aging symptoms are successfully reduced, giving the complexion a more youthful appearance.
