#### What is PPC?

PPC(PhosphatidylCholine) spotlighted as the latest solution to obesity, is being called 'the 2ndbtb'. No single case of side-effects has been reported in the clinical trial over 10,581 patients implemented in the UK and has been made even more renowned since celebrities like Britney Spears and Mariah Carey look like this PPC treatment and it ended up with a success. It has now become very popular in over 60 countries.

#### Application & Method

1. Shake ampule to mix PPC that is sunk at the bottom of ampule
2. Use 18G needle to extract PPC from ampule and use 27G needle to inject on the target area
3. Mark injection points on each target area with pen
4. Injection manuals according to each target area

| Target areas     | Injection points                   | Space between each point | Injection quantity / each point | Total ampules /target areas |
|------------------|------------------------------------|--------------------------|---------------------------------|-----------------------------|
| Abdominal areas  | About 125 points                   | 1 cm                     | 0.7~0.8cc                       | 8~10 ampules                |
| Fatty back       | About 100 points                   |                          |                                 | 6~8 ampules                 |
| Black low in fat | About 75 points                    |                          |                                 | 4~6 ampules                 |
| Both forearms    | About 38 points each both forearms |                          |                                 | 4~6 ampules                 |
| Both thighs      | About 50 points each both forearms | 0.5 cm                   | 0.5cc                           | 6~8 ampules                 |
| Chin             |                                    |                          |                                 |                             |

#### 5. Injection intervals

- (1) 1 week-interval: You inject today, second injection is after a week.
  - (2) 2 weeks-interval to repeat same target area injection.
- You inject on Abdominal area today, second injection area is any other area except abdominal area after a week.  
You can inject on Abdominal area AGAIN at Third injection.  
So, injection interval of same target area is 2 weeks.

#### Instruction For Use

##### Injection area:

Double chin, waist, arms, legs, belly

##### Depth of Injection:

3-5mm into fat layer. (Usually for 3-4mm deep for face, and 4-5mm deep for body.)

##### Way of injection:

It needs to be injected into the subcutaneous layer. The distance between each injection points should be around 10mm. Each injection point need 0.2-0.3ml for face, while 0.3-0.5ml for body.

#### Areas & Effects

- ✓ No treatment for bean allergy patients
- ✓ PPC, which is the main component of Lipd Lab, does not only treat subcutaneous fat, but also muscles nerves, and blood vessels
- ✓ Pigmentation or lump in the treatment area is healed naturally within 2-3 months
- ✓ Do not use in areas where there is a wound or eczema and dermatitis (This symptom is normal reaction of PPC, so you can take an analgesic heat medicine (Tylenol)).
- ✓ Patients with heart, diabetes, cancer, stroke and arteriosclerosis
