EPTQ e.p.t.q is a safe, stable and effective Cross-Linked sodium hyaluronate HA dermal filler. - Consistent smooth injection throughout the treatment - Naturally volume and look. - Much more solid, durable and natural looking of all course of time when it is gradually absorbed into the skin.

EPTQ e.p.t.q is a top-quality Hyaluronic Acid filler designed for subcutaneous injection

This effective product is an excellent solution for the treatment of wrinkles and it specifically focuses on deep to severe wrinkle removal

E.P.T.Q is a word formed from 'Exquisite' and 'Technique'. E.p.t.q. is made for women who want to manage exquisite detail of beauty to achieve their true selves.

E.p.t.q. line consists of 3 fillers that cover the overall requirements and desired performance for dermal fillers. E.p.t.q. is a high-quality product that is produced accordingly to the manufactures process: "The 9 Essentials." Implying 9 criteria for the standards of the hyaluronic acids. This ensures e.p.t.q. can live up to the European safety standards like CE 2292 and KFDA. The base of e.p.t.q. is cross-linked hyaluronic acid. Cross-linking is a chemical process that links hyaluronic acid molecules to one another making the denigration slower than standard hyaluronic acid supporting a more youthfully and radiant skin.
